

Full Schedule of Activities Marks Spring Convocation

C. D. Howe, Abbott and Keys To Address Graduate Dinners

By ROSEMARY GRAVINA

Two federal cabinet ministers and an atomic energy scientist will address graduating class dinners as part of the activities of Convocation week, which culminates on May 30 with the Convocation exercises and the Ball, which will be held at the 17th Hussars Armory on Cote des Neiges Rd.

The Rt. Honourable C. D. Howe, minister of trade and commerce, and Dr. David Keys, director of the atomic energy project at Chalk River, will be the guest speakers at the Engineers' graduating dinner, which will be held on Friday, May 27 at the Ritz Carlton Hotel. Ralph Johnson, president of the graduating class, will be chairman.

The Honourable Douglas C. Abbott, minister of finance, will be the guest speaker at an Arts Science Commerce graduating dinner also to be held on the 27th. The banquet will be held in the Sir Arthur Currie Gym under the joint chairmanship of Leonard Harbour, president of the Arts and Science Undergraduate Society, and Ted Blake, president of the Commerce Undergraduate Society.

Guests of Honour at the ASC dinner will include Dean H. N. Fieldhouse, Dr. J. B. Rollet and Mr. S. H. Dobell, plus the chairmen of the various departments in the Faculty and School.

Activities
Women graduates of all Faculties will attend a banquet at R.V.C. the same evening, and the guest speaker for the coeds will be Barbara Whiteley, vice-president of the Junior League.

Saturday, May 28th is McGill Day at Belmont Park, and free tickets are available at the Union. There will be special reductions for students on many of the rides and entertainments at the Park.

A convocation mass will be held at the Sacred Heart convent on Sunday morning, to be followed by a non-denominational baccalaureate service at 11 a.m. in the Sir Arthur Currie Gymnasium. Rev. Clifford Knowles, chaplain of the university, will conduct the service, and Principal James will address the

(Continued on Page 11)

Four McGill Students Go To Holland

Four McGill students have been awarded scholarships to attend the second International Student Service seminar which will be held in Castle Bouvigne near Breda, Holland, from July 11 to August 15.

Bob Gill, second year law; John Ballon, first year medicine; Rex Lucas, postgraduate sociology; and Len Beaton, fourth year political science, will sail from Quebec City June 30 on the S.S. Volendam with 50 students from 21 universities and colleges across Canada.

For five weeks they will attend lectures and discussion groups with 60 students from nearly every country in western Europe. The theme of the seminar will be "The Individual in Society." Prominent faculty members from various universities in Canada and Europe will give lectures and supervise the discussion groups.

The seminar will be financed by the provincial government of Canada and by various other interested organizations. Funds collected by I.S.S. during the annual campus drives are used only for relief purposes and are not used for the seminar.

Each university chooses its representatives to the seminar on the basis of participation in student activities, maturity, ability to contribute to the seminar discussions and to tell of their experiences on their return to Canada, and academic standing.

Following the seminar the students will have two weeks to travel in Europe. They will sail for New York from Rotterdam August 31.

The first I.S.S. seminar was held last summer at Ploen, near Kiel, in the British zone of Germany. It was financed by the provincial governments of Canada, the British Control Commission of Germany and the Canadian Council for Reconstruction through UNESCO.

A Message From The Principal

To each one of you, members of the Class of 1949, I offer my congratulations on what you have already accomplished and my best wishes for all the years that lie ahead of you. At the Garden Party, on the afternoon of Convocation Day, I hope to greet each one of you personally.

In the United States the ceremony of conferring degrees is aptly called "Commencement." It is the beginning of that career for which you have been preparing yourselves at school and at McGill. You are on your own from this time forward, but I hope that pleasant memories of your days at McGill will accompany you at all times and that you may find inspiration in the good wishes of your teachers. The days behind us have been strenuous, but they have been happy. You might be embarrassed if I should talk about your character and praise your achievements, but to us who have worked with you these things give promise of great accomplishment during the years that are to come.

It is no empty figure of speech to say that Canada, and indeed the world, is waiting for you. We still have to attain in very truth the things for which so many of you fought. We stand in great need of young men and women whose ideals are clear, whose determination is unshaken, whose courage is beyond the praise of words. With those qualities you can accomplish what other men have thought impossible.

Good luck go with you through all your days. May you not only attain success but keep your happiness.

DR. F. CYRIL JAMES,
Principal and Vice-Chancellor.

HON. D. C. ABBOTT

RT. HON. C. D. HOWE

DR. DAVID KEYS

Former Daily Editor Wins Radio Award

Charles Wasserman, a former editor-in-chief of The Daily, has received a special award of merit from the Ohio State University committee on radio awards for a radio script entitled "Thousands Of Characters In Search Of A University."

The script was used on one of 22 broadcasts sponsored by the McGill Fund. It is based on the 133 year history of the university, written in a light vein, depicting the search of the student body for education during those years.

Mr. Wasserman, an arts graduate of '46, was editor of The Daily for the year 1945-46.

New RVC Wing To House 163; Ready Next Fall

Accommodations for women students at McGill University will be increased next fall when the new \$750,000 wing of Royal Victoria College is opened, Dr. Muriel Roscoe, Warden, announced recently.

Construction on the new wing which will provide accommodations for 163 women undergraduates is being speeded up during the summer. With the addition of the new wing, a total of 301 students may be housed under one roof.

Royal Victoria College provided Common Room, medical, library and Women's Union facilities for the 1,500 women students registered at McGill for the 1948-49 session. The medical facilities include a modern 12-bed infirmary, with two nurses in attendance.

Kitchen and catering facilities have been enlarged and remodelled to include a large cafeteria which proved very popular with students. This progressive program in the interest of women students stemmed from the initial efforts of Sir William Dawson and Donald Smith (who later became Lord Strathcona) to get higher education for women at McGill.

Lord Strathcona made generous gifts and later built Royal Victoria College, which was opened in 1899, the year that the first class of eight co-eds graduated from McGill. In addition to Royal Victoria College, McGill has two other women's residences, McLennan Hall on Ontario Avenue, and Donald House, situated on the east side of Royal Victoria College.

McLennan Hall with accommodations for 30, will be placed at the disposal of women students doing graduate work.

University authorities said numerous applications for residence

Special Convocation Honours Educators

McGill University will confer the degree of Doctor of Law on three leading figures in the field of education, at a special convocation to be held on June 17. The names of the principals, announced today by Dr. F. Cyril James, principal and vice-chancellor of the university, are:

Prof. Lillian M. Penson, vice-chancellor of the University of London; Prof. Douglas B. Copeland, C.M.G., vice-chancellor of the Australian National University at Canberra, and Prof. Pramatharath Banerjee, vice-chancellor of the University of Calcutta.

The ceremony will be followed by a dinner in the evening.

The educationists will attend the meeting of the National Conference of Canadian Universities, of which Dr. Cyril James is president.

have been already received and are under consideration for acceptance. The applications include students from all parts of Canada, the United States, Great Britain, Europe, and other foreign countries.

Profs Receive Guggenheim Fellowships

Guggenheim Memorial Foundation Fellowships have been granted to two McGill men, Dr. Earl F. Beach, Bronfman professor of economics, and Dr. Morton Wilfred Bloomfield, a McGill gold medalist, who is now professor of English at Ohio State University, Columbus, Ohio.

Dr. Beach's Fellowship will allow him to carry out his advanced study project in the application of higher mathematics to the problems in economics at the University of Chicago.

He joined the McGill staff in 1919 and served for some time as director of the School of Commerce. He is now chairman of the social science group in the faculty of arts and science.

Dr. Bloomfield will conduct research in Europe for a book on the intellectual background and content of the 14th century English poem, "Piers Plowman."

Other Canadians to receive Guggenheim awards are: Dr. C. Ouellet, professor of physical chemistry at Laval; Dr. R. MacG. Dawson, professor of political science, University of Toronto; Dr. M. MacK. Ross, associate professor of English, University of Toronto.

Rockefeller Gift

McGill To Compile Ex P.M.'s Memoirs

A gift of \$100,000 by the Rockefeller Foundation will make possible the preparation of a document of vast historical value to all Canadians, and McGill University will have a major role in the work.

Statements were released by Rt. Hon. Wm. Lyon Mackenzie King and Dr. F. Cyril James on April seventh. They told of the monetary gift which will enable McGill to give Canada's former Prime Minister the expert aid he will require to compile his memoirs.

First Citizen
Mr. King was Canada's first citizen for more than twenty-one years, a Commonwealth record, and in the course of his long diplomatic and political career he naturally accumulated an immense amount of documentary material and correspondence. The work of compiling all this material into an authoritative historical document will be a long, hard job, and a task far beyond the capacities of any one man. Mr. King is now in his 75th year and has been in ill health for some time past. He told the press that "without expert assistance, I would find it necessary to abandon altogether attempting anything beyond a record of personal experiences and events in which I have participated."

Dr. James pointed out the great importance of Mr. King's personal records, and expressed his sincere hope for early and successful completion of the work. He further stated that "McGill University is proud, and privileged, to participate in this unique project."

The grant will enable Mr. King to obtain throughout the next three years competent assistance in the great task. None of the money will go to him for personal use. The conditions of the grant leave him free to organize the work and publish the material in any manner he may wish, without other supervision or management. Neither the manuscript nor the plans for publication will be subject to review either by the Foundation or the University.

In his early years Mr. King was associated with the Rockefeller Foundation as an investigator of industrial relations. Two months ago he was visited by Foundation directors who came to Ottawa to see his files in the Archives at Laurier House. They suggested that the Foundation might help to publish these documents.

McGill's Part
Later Dr. James was asked by the foundation whether McGill would be willing to sponsor and co-operate in the work. Dr. James replied to the Foundation and entered into correspondence with Mr. King, telling him of the offer of assistance. Finally, the news came on April 6 that the trustees of the Foundation voted \$100,000 at their meeting to aid in the work.

Mr. King called the grant "a quite exceptional expression of international friendship and goodwill," and said that it will afford him an opportunity of continued public service seldom given to one whose life has been almost wholly concerned with affairs of state.

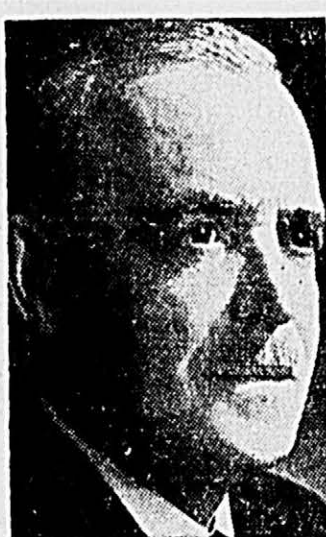

Record Class To Receive Degrees At Convocation

St. Laurent, Angus and Pratt To Be Honoured at Ceremony

By ELINOR KYTE

A Canadian statesman, a poet, and a political scientist will be honored with degrees at the annual spring convocation of McGill University on May 30 when some 1,900 students, of whom 800 are veterans, are expected to receive degrees and diplomas in an open-air ceremony on the campus.

Chief Justice O. S. Tyndale, chancellor, and Dr. F. Cyril James, principal and vice-chancellor, will confer the degrees upon Prime Minister Louis St. Laurent, Professor H. F. Angus, Professor E. J. Pratt, and the graduating class which is the largest in the university's history.

HON. LOUIS ST. LAURENT

PROF. E. G. PRATT

PROF. H. F. ANGUS

New Alumni Building Planned at McMaster

In a recent ceremony at McMaster University, Senator James Nicol, Quebec newspaper publisher, turned the first sod for the new alumni memorial building.

Funds for the new building were contributed by the alumni association, of which Senator Nicol is a member. The association decided at a business meeting earlier that construction of the building will be started immediately.

The alumni memorial hall is planned as a center of both alumni and student activities. There will be lounges on the ground floor, and offices on the second floor for student and alumni meetings.

Grad President Outlines Society Organization

Mr. F. G. Ferrabee (B.Sc. '24), president of the Graduates' Society, together with his executive committee, entertained the presidents of the various faculty graduating classes at a luncheon on Thursday, May 19.

The purpose of the luncheon was to explain to the permanent class presidents the organization and set-up of the Graduates' Society, and what the Society had to offer the Class of '49.

Besides Mr. Ferrabee at the luncheon were Mr. W. F. MacKlaier, K.C., second vice-president of the Graduates' Society, Mr. Alan A. Macnaughton, K.C., honorary secretary, Mr. R. I. C. Picard, honorary treasurer, Dr. C. J. Tidmarsh, immediate past president, Mr. L. N. Buzzell, immediate past president of the Montreal branch, and Mr. Colin Webster, vice-chairman of the McGill Alma Mater Fund.

Mr. Ralph M. Johnson represented Engineering '49; Mr. R. A. Crepault, Law '49; Mr. W. A. Orban, Phys. Ed. '49; Mr. C. W. Fraser, Library School '49; Mr. Gilles Gagnon, Arch. '49; Mr. D. J. Johnston, Arts '49; Dr. H. E. Fleming, Dentistry '49; Mr. J. Fyfe MacDonald, Medicine '49; and Mr. George Holland, Commerce '49.

Mr. Ferrabee explained to the presidents of this year's graduating classes that the society has 43 branches, one in Great Britain, one in the British West Indies and the balance in the various cities in Canada and the United States, to which this year's graduates would be welcome as soon as they advised the central office on University street of their permanent addresses. In order to obtain these addresses, the Graduates' Society will have three of its representatives in the Arts Building at the time when the caps and gowns are being distributed for Convocation with forms which the Class of '49 will be asked to complete. At the same time, a memorandum on the various activities of the Society will be distributed.

The awards were presented as follows:
The International Hillel Key: Irwin Gliserman, Frances Lerner, Judith Lipshitz, Perry Meyer, Julian Pearson, Margaret Schwartz, Alec Schwartzman and Jack Shayne.

The Honors Insignia: Edward Caplansky, Fred Cleman, Roslyn Cohen, Seymour Cohen, Ben Goldstein, Myra Mendelsohn, Muni Pearl, Issie Rivell, Mervyn Silverberg and Gloria Victor.

The Student Council Award: Allan Bernfeld, Boris Berbrer, Eleanor Goldsmith, Lieba Lewis, Seymour Machlovitch, Irving Paul, Nancy Solomon and Jon Wolfe.

The International Hillel Key is presented to graduating students who have been active in Hillel all through their college careers. It is the highest award which any Jewish student can receive for extra-curricular activities.

Bishop's Convocation To Be Held June 17

Bishop's University, Lennoxville, will, according to a long-standing tradition, present honorary degrees to distinguished representatives of the clergy, the judiciary, industry, the field of letters, and French-Canada.

George H. Montgomery, K.C., chancellor of the university, announced the names of this year's recipients. They are:
Edwin John Pratt, of Toronto, distinguished Canadian poet; Rt. Rev. Robert Jefferson, Lord Bishop of Ottawa; Col. A. A. Munster, Sherbrooke industrialist and vice-president of the university's corporation; Lawrence Hunt, of New York, and Chief Justice Albert Savigny, of Quebec.

The awards will be made at the university's annual convocation, which is being held on June 17.

NOTICE

The McGill student's handbook will be going to press within the next three or four days. Any club or society wishing to place the names of its executive in this issue should hand the list of names in to Miss Heasley, in the Union immediately.

Time-table of Activities

Friday, May 27th—A.S.C. Dinner, Sir Arthur Currie Gym. Eng. Dinner, Ritz Carlton Hotel. R.V.C. Dinner, R.V.C.

Saturday, May 28th—McGill Day at Belmont Park.

Sunday, May 29th—9.30 A.M. Convocation Mass, Sacred Heart Convent. 11 A.M. Baccalaureate Services, Sir Arthur Currie Gymnasium. 4 P.M. R.V.C. Tea.

Monday, May 30th—10.15 Convocation Ceremony. Campus if fine, Forum if wet. 1.00 P.M. Tree Planting Ceremony. 4.00 Principal's Garden Party. Campus if fine, Gymnasium if wet. 10.00 P.M. Convocation Ball.

17th Hussars' Armory, Cote des Neiges.

LOOKING AHEAD

At this time, when most students have recovered from the rigors of studying for examinations, McGill "types" are less concerned with the campus and more with the problems involved in seeking summer employment, and, in the case of the graduating class, a permanent field of endeavour and source of income.

Before signing off, however, one should be aware of the very serious financial problems facing the Students' Executive Council next session. For certainly extra-curricular activities next year will be subjected to severe austerity—the guiding motto may well be "if it will cost money, then it will have to wait."

For the resources of the Students' Society have been tapped so often in the past few years that today the surplus fund is less than ten thousand dollars. No one has made unnecessary expenditures, or been guilty of significant waste—it is simply that capital expenditures unanticipated by depreciation funds have been necessary during the past few years. These include a pension plan for the employees of the Union, changing the lighting of the Union from DC to AC current, and replacing the furnaces in the Union.

The Union is certainly in need of repair, and of a good face-lift. And the facilities are inadequate. But there are simply no funds available for immediate improvement—maintenance eats up every penny allocated President Jack Crepeau.

Jack will have big problems on his hands next year. But he has big plans too, and if he can make them mature, the general situation should be relatively good.

But he will have his troubles. To take one small example; while the Union has living accommodations for four persons, five students may have to live in to fulfil their administrative

responsibilities—the President of the Students' Society, the President of the Union, a member of the Union House committee, and the Editor and Managing Editor of The Daily.

The solution to this problem was anticipated two years ago by a special investigation committee which committed the Council to provide additional facilities in the quarters occupied by the President of the Union—these facilities to permit a member of the Union House Committee to bunk in with the President.

Hal Corrigan, Chairman of the Finance Committee and Mike Elwood, a leading member of his committee, both of whom are on the Council, will have their hands full next year trying to keep us in the black. With sufficient backing by the Council, they can do it.

The problem outlined above is one for the students who will be here next year. Those leaving the university have other problems facing them at this time, all of which can be adequately summarized in the simple words "the future."

We wish the solutions to those problems were as evident as the one to the problem facing the students' body, but of course they are not. All The Daily can do is wish every graduate the best of fortune and happiness. But good wishes alone are good for morale and little else; every person must work out his own solutions.

Just one reminder. Those who leave have had a splendid opportunity, made possible in great part by the responsible members of the community who have given of their time and money to make available to us the facilities we have used at McGill. We owe a debt, a debt we are expected to repay to succeeding generations by making available to them this same opportunity. — F. C.

National Radio Poll Results; Reiner's "Salome" Outstanding

Three conductors entered the first prize lists for the first time in MUSICAL AMERICA'S annual National Radio Poll, conducted for the sixth year by the noted music journal. They are Fritz Reiner, who swept into favor along with the opera, Salome, which he conducted at the Metropolitan Opera and which won overwhelmingly as the outstanding Metropolitan broadcast; Leonard Bernstein, young American conductor, who led all others as Guest Symphony Conductor; and Arthur Fiedler, who is celebrating his twentieth year as conductor of the Boston Pops Orchestra, which now plays over NBC for the RCA Victor Program. Mr. Fiedler was chosen as outstanding Program

Conductor: Fritz Reiner (ABC); Program Conductor: Arthur Fiedler (NBC); Orchestra with Guest Soloists: Telephone Hour (NBC); Concert Ensemble: Longines Symphonette (WOR and local); Operatic Program: Metropolitan Auditions of the Air (ABC); Vocal Ensemble: Robert Shaw Choral; Instrumental Ensemble: NBC String Quartet; First Piano Quartet (NBC) (tie); Instrumentalists: Pianist: Robert Casadesu; Violinist: Jascha Heifetz; Organist: E. Power Biggs (CBS); Woman Singer: Marian Anderson; Man Singer: Ferruccio Tagliavini; Announcer-Commentator: Deems Taylor (CBS, Mutual); Best Script Material: New York Philharmonic-Symphony Intermission; Feature (Week-end with Music) (CBS). Other newcomers to the blue ribbon ranks, according to the results tabulated in the May issue of MUSICAL AMERICA, were Fer-

"The Glass Menagerie"

a play by Tennessee Williams

by Betty Sinclair

play by Tennessee Williams. "The Glass Menagerie" is a play of memory. Tom, "the bastard son of a bastard father," runs away from the futility of life, in a St. Louis tenement, deserts his mother and sister as his father had done before him. But he cannot escape the misery of remembered things. With him the audience looks through the grey mists of memory to the nagging mother, who lived in the pale reflected light of her past glories as a Southern belle; a beauty who could have chosen a husband from the moneyed class, but who chose instead a long-distance telephone man with a bewitching smile. They look through to the crippled sister, Laura, who collected delicate glass animals, and played old dance-records on the Victrola.

Tom recalls his mother's lively, cheerful "Arise and shine" that got him up in the morning for his job in the shoe warehouse, ("I'll get up, but I won't shine"), but her gaiety covered a deep unhappiness, a struggle to keep up appearances, a desire for a gentleman caller, so that Laura should not become an old maid. She loved the past, hated the present, and feared the future. Through all her nagging could be heard the plea, "What's to become of us?"

Laura once loved a fellow in high school, the boy acclaimed as most likely to succeed. But she was crippled; love and marriage were not for her, and with her animals she withdrew into a dream world of her own. When a gentleman caller finally came to supper, he was the boy from high school, who now worked beside Tom in the warehouse. He kissed her—for a brief moment she lived; then he told her that he was engaged to another girl. Her romantic illusion was shattered—like the horn of her favorite glass unicorn he knocked onto the floor—and she went back to her dream world.

The device of narrator gives the play perspective; the harshness of reality is softened by time, distance, and a pervasive sense of pity. Tom is haunted by memory; a snatch of an old dance-tune played in a riverside, cafe carries him back to a worn-out record on a Victrola, to the pianist in the Paradise Dance Hall across the alley. "I have been more faithful than I had intended, Laura."

The MRT production of Tennessee Williams' play (the Playhouse, March 31st to April 9th) was origi-

ally in the skilled hands of Herbert Whittaker. While the play was still in rehearsal, however, Mr. Whittaker left Montreal for fresh theatrical fields in Toronto, and RoBERTA Beatty took over the production. A change is usually undesirable, but here the efforts of Mr. Whittaker and Miss Beatty had only the happiest results. There were faults, some of them resting upon the shoulders of the actors, but the production as a totality conveying the sense of belonging, the futility, the frustration, and the poetry of Mr. Williams' play.

Much depends upon the set, which was designed for this production by Mr. Whittaker and Hans Berends. Imaginatively conceived and executed, the MRT set had a four-dimensional quality which shocked the audience into a feeling of closeness to the players and conveyed in a very full sense the oppressiveness of a semi-slum. The role of Amanda, the mother, was a great personal achievement for Laurette Taylor in the original New York production. It is a difficult part, running the whole gamut of emotion, and demanding quick changes of mood and a fine shading. Amelia Hall, imported from the Ottawa Drama League by MRT for the role, was often brilliantly convincing. But Amanda is a glibulous woman, and there are several long speeches.

Here Miss Hall failed. She spoke so rapidly that the lines became garbled; one heard them without grasping their full meaning. A comparatively small flaw, but one which marred an otherwise striking portrayal of a woman caught in the vortex of a wanton world. Betty Taylor Fenwick hasn't quite the physical frailty of Laura, but her performance was sensitive and controlled. She conveyed a sense of "other-worldiness," yet gave the impression that this other world was for her the only reality. When the gentleman caller brought love for a moment within her grasp, she seemed then to be living in a dream, and with a resignation that was almost tender she stepped back into the world that was right for her.

As Jim, the promising boy who had disappointed all expectations, George Powell gave a performance that was careful, convincing, and consistent. Him, too, had tasted the bitter fruits of frustration and disappointment; his panacea was a course in public-speaking, backed up by another in electrical engineering. But for all his vociferous optimism, he cannot convince himself of the promise of the future.

Silvio Narizzano played Tom, the son who would be a poet, who chafes at the chains that bind him to a sordid life, who loses the chains, only to find that there is yet no escape. In his readings of the narrations preceding the earlier scenes of the play, his voice lacked quality and range, but his performance of the play itself was a continual joy to watch and to listen to. He wove moods of rebellion, tolerance, anger, and pity, into a complete and satisfying picture, with overtones of humour that never obtruded. As the play continued, his narrative passages gained a necessary lyric quality, and his final message was intensely moving.

"For nowadays the world is lit by lightning. Blow out your candles, Laura—and so, goodbye."

BIRKS JEWELLERS

1900 Grads. to Be Capped at Convocation — News Item

L.R. ASHLEY Engineer

Above is illustrated a revolutionary machine calculated to take the drudgery out of Convocations. Chancellor pulls cord A, releasing B and allowing one hard, round peppermint candy C to fall from chute D to tee E. Midjet Scot F then knocks peppermint E (using F prime) into hole F. It then falls down chute G, hits trigger H, and bounces into Chancellor's lap, I. (Chancellor may then eat the peppermint himself or else give it to one of the faculty or guests to stop that inevitable Platform Cough.) Mr. Kille trigger H has caused axle J to fall, splitting an atom in K. The released energy then operates mechanism L, which causes photograph M to blow out graduate's name through horn N. The energy also causes mechanism O to press button P, causing

hammer Q to smash bottle of milk R. The milk flows into bowl S to be consumed by cat T. The cat's subsequent purrs are picked up by microphone U. The sound waves are converted into electrical impulses in mechanism V, and this electricity travels along wire W to operate applause machine X and through wire Y to turn wheel Z, which touches each graduate with a cap (as well as congratulating him) as he passes beneath (on conveyor belt—not illustrated). Auxiliary mechanisms keep replenishing supplies of peppermints, atoms (assorted sizes), milk and cats. These have not been shown, the intention being to keep the explanation very clear and simple.

erson, contralto, as Woman Singer; and the Telephone Hour, which, with Donald Voorhees as conductor, once again carried the honors as Orchestra with Guest Soloists. The return to favor of the Longines Symphonette, a winner of other years in the Concert Ensemble category, and a tie between the NBC String Quartet and the First Piano Quartet for first place as Instrumental Ensemble, were other noteworthy incidents. For the third time, the National Broadcasting Company won a special award as the network which has most faithfully served the cause of serious music.

A new interest in contemporary music was revealed by the selection of compositions which have pleased the critics this year. The most votes were cast for Ralph Vaughan Williams' Sixth Symphony, although prominently mentioned were several works by Bela Bartok, and at least one each by David Diamond, Samuel Barber, Walter Piston, Arthur Honegger and Igor Stravinsky. Benjamin Britten's Peter Grimes, the opera winner last year, remained popular this year, appearing in three categories; outstanding event, best opera, and best contemporary work.

The voters expressed their opinions on music education on the air, in response to a special question in the poll. Most answers deplored the lack of co-operation between the public schools and the networks, but few constructive suggestions were offered. Local stations, apparently, are falling badly in any attempt to do a constructive job musically, either for young people or for older listeners who want good music both as entertainment and education.

Notes Taken at a Small Funeral

by Gene Jousse

It is not my custom to frequent the Union. When I was a freshman, father said that it was not exactly the place to go to, if I wanted to make contacts. Many of my fellow students said that they would not be seen there, dead. And so, for the four years of my attendance, I have not gone to the Union. But I have been seen in the right places, with a lot of dead people. The rumors I heard about the place, (they say it smells of food... and drink) and the three visits I made to do a little power voting were enough for me. I hope that my contacts will still be intact when I have told my story. I have always had a secret yearning to get something into the Daily. In spite of what my friends say, I don't see anything so Bohemian about writing for a college paper.

I would hate to throw away four years of active service on more executive boards than you could find Gold Awards for, but I must tell of what I saw. Let me state first, however, that I was practically pushed into the Union by a crowd which was trying to keep out of the rain. I had almost two hours to wait for an exam to begin. I must also say that I am as well informed about the Union and what goes on there as the next chap. There were perhaps thirty people in the Grill Room. I lined up for a cup of coffee and then went to a corner table where I could be alone. I could not see much... there was smoke and gloom everywhere. This accounts, of course, for my act of sitting at a table which was occupied by three men and a young woman. They were all chanting a familiar musical commercial which ends: "Listen while I tell you, what's in a name."

After the song, one lean man took a copy of Cue (Vol. XIX, No. 5) from an inner pocket of his Gold Lounge and said: "The lesson to-day is found in the writings of Prof. Emrys M. Jones. The subject, 'STUDENTS' TOUR IN THE WEST.' The lean man then read from the April 1949 Cue an article which told about the activities of a university drama group and how it succeeded in its first summer tour. The name of the University and the province in which it can be found were spoken only in the softest of tones. The lean man told me later that this was because of the present electoral campaigns. When the reading was over, the little group said amen... and, it is writ... and again sang: "What's in a name."

At this point the young woman looked at me, her eyes filled with tears, and asked me if I was interested. "Won't you join us. Do you attend McGill? Of course you do, or you wouldn't be in here. Pull your chair in here. We are holding a funeral."

Now I knew that the Grill had been used at all hours of the day and night, and for all kinds of goings on... but a funeral, well, here was something new. So I (forgive me boys) pulled my chair over as the lady had said.

"Whonellize?" snapped a chap with long hair and a hungry look. "Now be nice," said the woman. "five do not make a crowd at a funeral, do they?"

"The more the merrier," said the fat one, "if I may be so bold. Sit in, Mac."

And so I became a part of this strange little group. I hope that my friends will not object too much if I say that they were nice people... friendly, waiting for exams, cramming and worried... yes, they were nice people, even if they were actors.

The fat one now took charge of the ceremony. He spoke with a liquid diction which would have put many a lecturer to shame. As he warmed to his topic, the young woman nudged me.

"If you think this is good, you should have heard him do 'Hamlet's Advice' in English 13."

"We are gathered here to-day," the fat one was saying, "to bury our little child. We all know how difficult it is to bury her, particularly since she was never born, but that is why we are here. Like all good parents (undergraduate at least) we tried to breathe some life into her, and to prepare for her coming. And didn't we succeed (by appealing to the charitable instincts of some kind people) in clothing her, lighting her and

... and didn't we give her a name?"

By this time I was completely engrossed. Again, "What's in a Name" was sung and I, of all people, joined in.

"What have we got to hit them with, a steam roller?" This from the hungry-looking one.

The fat one continued his dirge: "You've got a good tenor there, Mac. Join the Choral Society next year, they could do with..."

"What is the matter with them? Don't they read Theatre Arts, Saturday Night, Brooks Atkinson? What have we got to hit them with, a gill-edged dividend?" Again it was the hungry one.

"Don't pay any attention to him," the young woman said softly, "he is young, and therefore bitter."

"What is your favorite song, Mac?" said the lean one to me.

"What's the matter with Old McGill," I answered bravely.

"Tell him about that," said the young woman.

"She is broke," said the hungry-looking one.

"And so are a lot of people," said the lean one.

"And that is not conducive to touring theatre," said the fat one.

"Is the funeral over?" I asked.

"Yes. This is the second one. We had one last year too, you know," said the lean one.

"What have we got to hit them with, the second coming of Brigadoon?" said the hungry one. The four stood up. I got up with them. They shook hands with each other, and me. I said that I must leave. They all wished me luck in my examination. As I left, they were all sitting there rather sadly. Three of them were singing, "What's in a name" and the hungry-looking one was asking: "What have we got to hit them with?"

Saskatchewan Student Actors Announce Second Tour

by Prof. Emrys M. Jones

Last summer eight students and graduates made up the touring company, each of them sharing the many tasks of staging, driving, and business, as well as playing various roles in the plays we presented. Each member of the company was paid a guaranteed clear sum of \$300.00 for the twelve week season plus all his living and travelling expenses. Our season extended to fourteen weeks, so we paid each member an additional \$50.00. Our sources of income were from box office and from advertising in our programme. We managed to do better than break even and to lay enough money aside for organizational expenses for this summer.

We presented two plays in each town. A Doctor in Spite of Himself by Moliere and the Pyramus and Thisbe scenes from A Midsummer Night's Dream. The actresses took turns, each of them playing at one time or another every female role; but the men all stuck with their "inal" roles. We had four girls and four men altogether. One of the men was our company manager who attended to all business and was responsible for everything on tour; another looked after public

city and the operation of our sound truck which was sent to all neighboring villages for each performance; another was stage manager; and the fourth was our electrician. The girls took turns in performing the secretarial work, caring for costumes, setting the stage, looking after properties, and prompting.

The company played 77 performances in about 60 towns, cities, and villages from as far south as the American Border to as far north as the mining town of Flin Flon in Manitoba. The plays were very well received, the audiences seeming to favour the Shakespeare more than the Moliere.

Our setting and lighting equipment were specially designed by Mr. Frank Holroyd of our Drama Department. He invented an ingenious arrangement of triple folding screens painted on both sides by means of which we could affect completely different visual effect for each scene. He also built boxes in various shapes and sizes which were used in various combinations covered with various painted throws to represent tables, benches, settees, logs, stumps, etc. These boxes also carried all of our properties, costumes, drapes and lighting equipment. The screen settings were placed in front of a set of beige coloured drapes which we hung on each stage. We depended rather largely on our costumes also for visual effect. Mr. Holroyd and I also devised a stage lighting arrangement by means of which we were able to secure all the usual changes of colour, intensity and direction, while carrying around with us a lighting outfit which was of light weight and fitted into a small space. This outfit was such that it gave us complete lighting effects on all stages, large or small.

The company and all of its equip-

In all we covered close to 10,000 miles without serious mishap. It is our definite plan to make this a year-round venture.

PURPOSES OF THE PROJECT

What are our purposes? They might be concisely stated as: "to bring to every community no matter how large or small, how near or remote, on a non-profit basis, the best possible productions of the best plays on regular and frequent visits; and, in doing this, to give young Canadians of talent the chance to exercise this talent professionally without leaving their own country." We feel that we have pretty well succeeded in this purpose to date and expect our success to be even greater as we grow.

Alumnae Inaugurates Yearly Oratory Event

A public Speaking Contest, sponsored this year for the first time by the education committee of the Alumnae Society of McGill University among the senior high school girls in the Protestant High Schools and private schools of this city, marked the inauguration of an annual event.

At the presentation of the prizes by the Alumnae president, Mrs. W. H. D. Buchanan, the Alumnae were congratulated upon their new project by K. Dichow, chairman of the student's public speaking committee of the Rotary Club, which for a number of years has been sponsoring similar contests among the boys of the city schools. Mr. Dichow emphasized the value of being able to speak in public.

A silver cup and \$25 were presented to this year's winner, Dorothy Wing, of St. Lambert's High School, who spoke on "Canadian Girl's in Training." Rachel Weintraub of Westmount High School whose topic was "The World of Tomorrow", was awarded the second prize of \$10.

A plane landed or took off from Chicago's municipal airport on an average of once every four minutes during 1948.

PSYCHIATRIC SOCIAL WORKER

Salary \$195-235 per month (including Cost-of-Living Bonus) required by

Dept. of Public Health, Mental Health Clinic, Saskatoon.

Requirements: some experience in social case work; university graduation supplemented by a degree from an accredited school of social work, including courses and field work in psychiatric social work; or an equivalent combination of experience and training.

For application forms and further particulars apply to:

Public Service Commission, 1730 Scarth Street, Regina.

Principal Stresses Financial Problems

"A \$200,000. deficit which will create great financial problems faces McGill 'next year,' stated principal James at the 10th annual dinner of the McGill Associates, held in the Ritz-Carlton Hotel on May 12 under E. J. Brunning who was elected chairman succeeding Henry G. Birks.

The Board of Governors of the University, Dr. James stressed, had incurred aggregate deficits of nearly \$900,000 since VE-Day in order to provide educational facilities for the large number of students who presented themselves since the end of the war.

The actual deficit for 1946-47, after taking DVA grants into account, was \$439,577, Dr. James said. For 1947-48 the deficit amounted to \$281,092. The present estimate of the deficit for the current session is \$180,554. He predicted that next year's deficit "will not be less than \$200,000."

While the amount of student fees, together with Department of Veterans Affairs grants, have risen from 34 per cent of the total annual university expenditure 10 years ago to 57 per cent during the 1947-48 session, Dr. James said, there was still large amounts of money in the aggregate to make up from other sources if the university was to continue its work effectively.

DECLARES COMMUNITY HAS FAILED IN JOB

McGill's position was much the same as that of other Canadian universities. "The community, in the case of both state universities and private universities alike, has failed," Dr. James continued, "to provide enough money to enable the universities to do the job which it has asked them to do."

"The quality of our educational facilities is endangered, and would have declined seriously had it not been for the devotion of scientists and scholars who have undertaken a greatly increased burden of work without receiving as great an increase in income as that which has readily been given by the community to the members of any respectable trade union."

DECLARES SCIENTISTS, SCHOLARS MUST LIVE

Touching further on the plight of university personnel, Dr. James pointed out that "scholars and scientists must live. They must pay their rent, and purchase food or entertainment like other men. Although they may enjoy the pleasure of teaching and research, there is a point at which they can no longer afford the sacrifice, so that they leave the university and enter the service of government or industry."

"I might also add," he continued, "that secretaries, bookkeepers, engineers and janitors have a clear eye fixed on the rates of wages paid outside the university, and I should like each one of you to think over the extent to which wages and salaries have increased in your own organization during the past ten years."

The cost of a university education, at least that part which was controlled by the Board of Governors, namely the fees, had been allowed to increase but very moderately.

"The price of an education at McGill University—the total income from student fees divided by the number of students—has increased from an average of \$228 in the spring of 1940 to \$261 in 1949. That increase of \$33," Dr. James pointed out, "in the average fee is 15 per cent of the price that was charged 10 years ago, and there is no other commodity as important to the welfare of Canada in which the increase has been so small."

ASSOCIATES PRAISED FOR SUPPORT

Dr. James lauded the Associates

for their support of the university. "On this 10th birthday, the Associates," he said, "can be proud of their own achievement. Their example has inspired the McGill Graduates Society to a truly spectacular achievement."

"After the completion of the War Memorial Campaign, so ably organized by Frank McGill and Eric Leslie, the graduates decided to follow in precise detail the pattern of the McGill Associates, and, through their Alma Mater Fund, establish facilities through which individual graduates could make an annual contribution to the revenues of the university."

"As a result of the work of E. P. Taylor and the members of his organization, 5,102 graduates have, during the first 10 months of the Alma Mater Fund, contributed a total of \$123,997 to our revenue. This achievement during the first year of operation, I am told, constitutes a new record for alumni annual-giving funds on this continent."

"The growth of the McGill Associates and the creation of the Alma Mater Fund have both helped towards a solution of the university's financial problems, and their further development in the future promises still greater assistance."

REFERENCE MADE TO FUND CAMPAIGN

Dr. James referred to the recent McGill Fund campaign, which has netted \$8,100,000. University investments by the end of the recent session will amount, he said, to \$2,478,528, compared with \$18,566,670 when the McGill Associates first met 10 years ago.

In addition to meeting pension needs and setting aside amounts to augment the funds available for the payment of salaries, there was also the great task of rebuilding the university since "most of our facilities are at least a third of a century old."

After outlining some of the most urgently needed construction projects, Dr. James said that "never in its long history has McGill had greater opportunities than those which confront it today. If I were to show you a list of those members of our teaching staff who have this year been offered important positions at other universities you would realize that we have a team of men and women who can make great contributions to the future wealth and welfare of Canada."

REVIEW OF WORK GIVEN BY MR. BRUNNING

The extent to which the Associates have supported the university since the inception of the organization was outlined by Mr. Brunning. In 1940, he said, there were 268 members subscribing \$12,280, an average of \$49.54 per subscription.

The number of members in 1948, the year under review, was 1,021. These members subscribed \$26,284, an average of \$25.75 per subscription.

Commenting on this progress, Mr. Brunning declared that "you will note that we are nearly two-thirds of the way towards the objective of \$40,000 envisioned in 1936. I am sure that if each member would, during the coming year, introduce at least one new member, our contribution towards McGill could be considerably increased."

EXECUTIVE COMMITTEE MEMBERS ELECTED

Guy E. Hoult was elected vice-chairman of the associates. J. E. Seybold continues as secretary. The following were elected to the executive committee for a period of five years: Joseph M. Breen, Alastair M. Campbell, F. Ryland Daniels, M. A. Metcalfe, Herbert K. McLean and Charles B. Neapole. The report of the nominating committee was presented by Ross Clarkston.

Jet Engine Research Furthered by Gifts

The board of governors of the University recently announced the receipt of gifts which will make possible the expansion and development research project—the Gas Dynamics lab. The research program, undertaken in cooperation with the Royal Canadian Air Force, is designed to further scientific knowledge in the field of diesel, gas turbine, jet and turbo-jet engines.

Professor Donald L. Mordell, associate professor of mechanical engineering, will head the new project. He holds the mechanical sciences tripos from St. John's College, Cambridge and did wartime research on the development of gas turbines for aircraft propulsion. He came to McGill in 1947. He has been carrying out experiments in the basement of the Engineering building, but the amount of noise generated and the lack of space made it necessary to move to less

confined quarters. The new home of the Gas Dynamics laboratory will be a building situated at Ste. Anne de Bellevue opposite the grounds of Macdonald College. It was erected by the government and used as a drill hall during the war. It measures 110 by 130 feet in area.

Sound-proof test cells and surplus war engines will be used to begin the expanded program. Later it is hoped that increasing facilities and knowledge will enable the workers to continue into diesel research. The program will provide a new opportunity for advanced students to continue their studies and gain experience in this field in Canada.

The gifts which made possible the newly-expanded research project are donations of \$10,000 from Imperial Oil Limited, and \$5,000 from Ford of Canada. In addition,

This congregation of luscious gals and handsome pals, namely, the Moonlight Serenaders, is only one of the treats in store for those lucky couples who will be dancing to the beat of Tex Beneke's band at the Convocation Ball on Monday evening, May 30th, at the 17th Hussars Armory.

the gift of a Rolls-Royce Nene turbo-jet engine, valued at \$20,000, was received from Rolls-Royce Limited, England.

One of the first nations in the world to utilize the gas turbine engine in successful industrial applications was Switzerland. The Swiss engineers built gas turbines for electric power generating plants with notable success when research in other countries was in its first stages. In 1943 the town of Neuchatel was equipped with an underground, bomb-proof gas turbine-generator installation capable of taking the whole industrial load from existing surface electrical installations.

Research in America and England has led to continual improvements in jet engines for aircraft. A gas turbine engine has been used successfully in one locomotive installation. It was pointed out by Prof. Mordell that natural gas, which is available in Canada in large quantities, and which has never been utilized on any large scale, is an excellent fuel for gas turbine engines.

Other gifts and donations received by McGill were an ultra-violet spectrophotometer valued at \$1,375, which was presented to the Chemistry department by Dominion Oilcloth and Linoleum Company, a gift of \$20,000 from the United States National Cancer Institute for biochemistry research, and various other large gifts of money for work in the fields of multiple sclerosis, cancer research, and psychiatry.

Ashton, Emily Laura, (distinction), Macdonald College; Bartlett, Marion Lois, Ottawa; Brittain, Bonney Elizabeth, Macdonald College; Crowsley, Sheila Maude, Ottawa, Ont.; Dave, Mary Alison, Bay Roberts, Nfld.; Fraser, Gladys Lorraine, St. Lambert, Que.; Garson, Ethel Lynn, Saint John, N.B.; Gibson, Eileen Isabel, Prince Rupert, B.C.; Goulay, Margery Georgina, Almonte, Ont.; Hamilton, Joan Elizabeth, St. Catharines, Ont.; Hayes, Elsie Caroline, Ottawa; Higginson, Edith Mary, Hawkesbury, Ont.; Hill, Mary Frances Stewart, Nappan, N.S.; Illingworth, Jean Stewart, New Liskeard, Ont.; Leslie, Ruth Treadwell, Montreal West.

McCombs, Marie Kathleen, St. Stephen, N.B.; MacDougall, Margaret Janet, Lennoxville, Que.; MacEwen, Mary Rose, Town of Mount Royal; Mendelson, Claire, Montreal; Mitton, Eleanor Jane, Truro, N.S.; Myles, Marjorie Ann, Saint John, N.B.; Nardsted, Vivian Alma, Hampstead, Oakes; Frances Irene, Flaport, Sask.; Robertson, Emily Ann, Victoria, B.C.; Sereney, Lorna Margaret, Braeside, Ont.; Shaw, Marjory, Westmount; Taylor, Nancy Ann, (distinction) Ottawa;

Queen's Campaigns For Over 3 Million

Queen's University is currently appealing to graduates, business and industrial firms, and the public at large for donations to increase endowment reserves and to cover the costs of essential new building and increased operating expenses.

Estimated financial needs of the university include \$1,000,000 for immediate construction, \$2,000,000 to increase the endowment capital, and an additional yearly income of \$175,000 to meet higher operating costs.

In a recent statement Dr. R. C. Wallace, principal and vice chancellor, stressed the fact that Queen's does not desire to become a large university. The influence that the university has always had on its students is due in part to the limits on its size, he declared.

Dr. Wallace stated that only construction which is absolutely necessary is being planned. A new \$200,000 administration building is one of the items on the program. Plans also call for the enlargement of the women's residence, Ban Righ Hall, at a cost of \$350,000. The number of coeds at Queen's has doubled during the last 10 years.

The principal also pointed out that under existing conditions the administrative staff, the students' employment office and the Alumni offices were all housed in the Douglas Library. "This seriously restricts the use of the library for students, staff, and research workers," he continued. When administrative workers vacate the library, conversion of the office space will cost an estimated \$100,000.

An additional \$350,000 is required to meet costs of the Memorial Building, now nearing completion, Dr. Wallace said. He explained further that a decline in interest rates makes it necessary to accumulate funds.

Taylor, Sheila Rosamond, Montreal; Turcot, Marjorie Joan, Westmount; Ward, Ada Leila Ursula, Drummondville, Que.; Wynne, Gladys Nelda, (Food Conservation Prize), Montreal.

Placement Service Seeks Information

All students who are registered with the McGill Placement Service are reminded that in the interests of all concerned, it is essential for this office to keep its files up to

date. If you have obtained summer work please cancel your registration and thereby help other students who have not been so fortunate.

It is also important that your present correct address and phone number should be listed here if you are still seeking employment. This applies particularly to students who have lived in University residences during the year and have now moved.

Over 1900 Will Receive Degrees Next Monday

Medalists, Award Winners Announced

The names of over 1900 students who will have degrees conferred upon them at next Monday's Convocation were released last Friday by The Senate of the University. This year's is the largest graduating class in McGill's history. The number of graduates exceeds that of the Class of '48 by approximately 400.

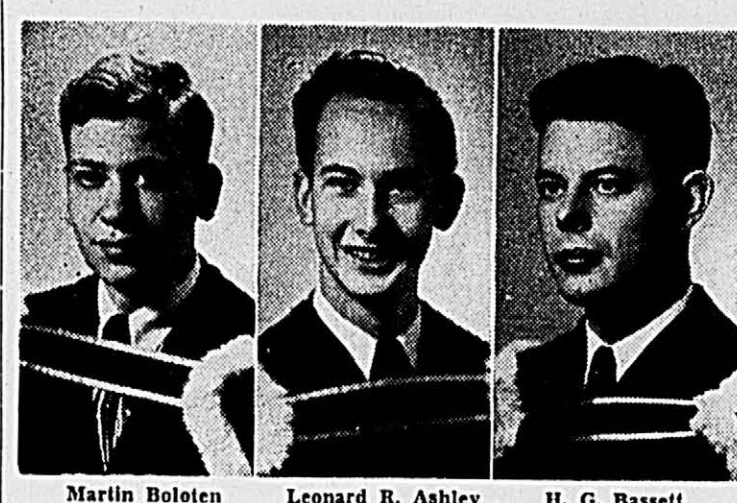

Included in the list issued by the University was an announcement of the students who were awarded medals. The pictures of the top award winners will be found elsewhere on this page. Following is a tabulation of the names of students who have fulfilled the requirements of their respective faculties and are thereby entitled to receive degrees from the University.

FACULTY OF ARTS AND SCIENCE

BACHELOR OF ARTS
Archer, William Lee, Toronto; Ash-ley, Leonard Raymond, First Class Honours in English, Montreal; Boushkin, Raymond, Second Class Honours in Economics and Political Science, Montreal; Barrett, Philip Alan, Pomeroy, Westmount; Beaton, Donald, Leonard, Second Class Honours in Economics and Political Science, Westmount; Berman, George Joseph, Port Arthur, Ont.; Birks, Richard Irwin, Second Class Honours in Philosophy, Westmount; Bishen, Bernard Russell, Second Class Honours in Sociology, Montreal; Brazeau, Joseph Ernest, First Class Honours in Sociology, Montreal; Britt, Lambert Joseph, Montreal; Brzezinski, Zbigniew K., Montreal; Brzezinski, Zbigniew K., First Class Honours in Economics and Political Science, Montreal; MacKenzie, Fellowship in Political Science, Cahill, Frederick Burke, Montreal; Cambron, Kenneth George, Quebec, Que.; Cameron, Stewart Harvey, Meadowville Station, N.S.; Campbell, Bruce Dawson, Lakeside, Que.; Church, Robert, St. Lambert; Clouston, James Macrae, Huntingdon, Que.; Coates, Ivan Michael, Preforia, South Africa; Connell, Herbert Basil, California; Cook, Geoffrey Casella, Montreal; Crowell, Clarence Robert, Second Class Honours in Mathematics and Physics, Montreal; Cummings, John Alexander, Montreal; Currie, Robert Albert, Second Class Honours in English, Ottawa, Ont.
Dennis, Graham William, Halifax, N.S.; Dixon, Howard Frederick, Second Class Honours in History, Stratford, Ont.; Dobell, William Michael, Montreal; Dolman, Mortimer, Outremont; Donald, Gordon Thomas, Westmount; Durnford, John William, Montreal; Eccles, William John, Second Class Honours in History, Westmount; Edelstein, George, Outremont; Feldman, Allan E., Montreal; Fenton, Kenneth Albert, Arundel, Que.; Ferguson, John Munroe, Dundee, Que.; Fine, Burrill Brook, Great distinction in the General Course, Montreal; Flair, Arthur, Herbert, Sask.; Fisher, Donald Ritchie, Westmount; French, Francis John, Pointe, Melville, Sask.
Gamble, Albert Edward, McMasterville, Que.; Garmise, Lawrence Morton, Outremont; Gilmore, Frank, S. Chrysostom, Montreal; John Saunders, Distinction in the General Course, Edmonton, Alta.; Gird, Michael, Eastbourne, Sussex, England; Gossage, William, McMasterville, Que.; Greco, John Paul, Montreal; Guishard, Bertram Ian, Everard, St. Georges, Bermuda; Hall, William Tenny, Waterloo, Que.; Hardy, Quentin Alexander, Barrie, Ont.; Harkness, Robert Hugh, Westmount; Hellyer, Frank Lorne, Second Class Honours in History, Outremont; Hemenway, Augustus Lawrence, Milton, Mass.; Heney, Edward Springett, Montreal; Hodgins, Donald Richard, Vancouver, B.C.; Holman, Roger Mark, Montreal; Hope, Robert Alexander, Westmount; Horn, Irving Harold, Outremont; Howe, John Donald, Chamby, Que.; Hurst, Norman, Montreal; Hutchinson, Thomas John, Milton, Vermont.
Hutchinson, Second Class Honours in English and Philosophy, Montreal; Inder, Harry Albert, Grindstone, Magdalen Islands; Jackson, Peter Edward, Arlington, Virginia; Jacques, Joseph Charles, Shawinigan Falls; Jones, Frank Edward, First Class Honours in Sociology, Montreal; Jousse, Eugene Theophile, Lachine; Kearns, Walter Gordon, First Class Honours in Economics and Political Science, Westmount; Kennedy, David, Westmount; Kennedy, John Stanley, Montreal; Kogan, Michael Newman, Montreal; Kolber, Ernest Leo, Montreal; Kowal, Walter, Montreal; Lamb, Sidney Stevens, First Class Honours in English and Philosophy, Montreal; LaPrairie, Roland Richard, Montreal; Larson, Charles Andrew, Montreal; Lawry, Lee Fisk, Timmins, Ont.; LeBlanc, Alphonse, Grand Falls, N.B.; Legge, Robert Charles, Montreal; Lehman, Geoffrey William, Montreal; Lewis, John Monk, Second Class Honours in Economics and Political Science, Montreal; Lieber, Jack William, Second Class Honours in English, Montreal; Locke, Charles Wilbert, Verdun; Lockwood, Richard David, Verdun, Second Class Honours in Psychology, Verdun; Lukawenko, Michael Philip, Montreal; Lundie, Ian George, Westmount; Lunney, Kenneth, Urban, Westmount.
MacFarlane, Angus McKee, Verdun; McKay, Huntly Walker, First Class Honours in Sociology, Montreal; McKay, Ian Albert, Montreal; McKay, John Agrel, Westmount; Maffre, John Malcolm, Montreal; Makin, Harry Gordon, Second Class Honours in Geography, Montreal; Mathewson, Arthur deWolfe, Montreal; Matthews, Richard Dunlop, Town of Mount Royal; Merrill, Geoffrey Hunter, Montreal; Merrill, Gordon Clark, First Class Honours in Geography, St. Thomas, Ont.; Meyer, Perry, First Class Honours in Pure Mathematics, Montreal; Miller, Harry Donaldson, Montreal; Mitchell, Charles Edward, Saint John, N.B.; Morris, Daniel, Second Class Honours in Economics and Political Science, Montreal; Neuman, Hugh Hanbury, Montreal; Neuman, Montague Philip, Distinction in the General Course, Montreal; Nelson, Harvey Johnston, Montreal.

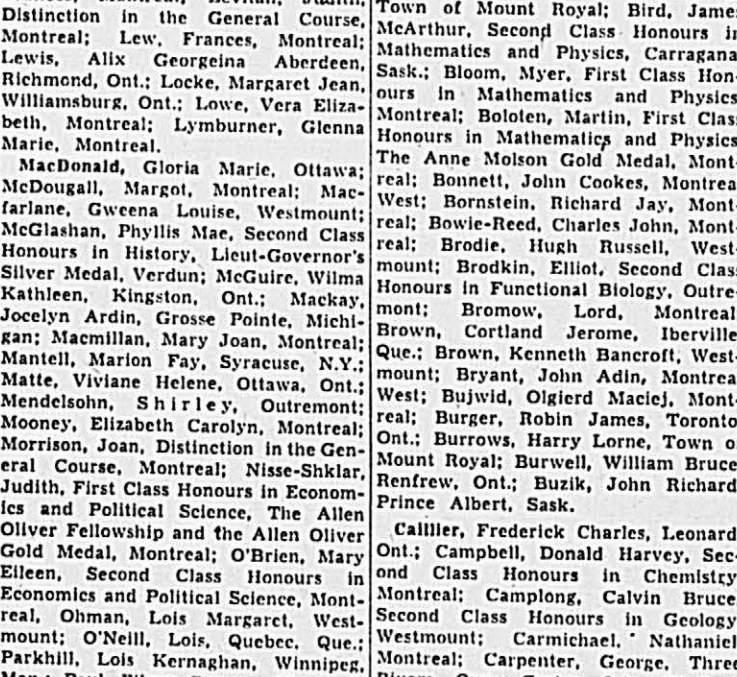

Claude Lavery J. O. McCutcheon N. F. MacFarlane

Mr. Lavery won the Montreal Bar Association Prize in Civil Law; Mr. McCutcheon, University Scholar, British Association Medal, Robert Forsyth Prize in Strength of Materials and Theory of Structures; Honors in Civil Engineering; Mr. MacFarlane, University Scholar, British Association Medal, Honors in Electrical Engineering.

Mr. Bolotin won the Anne Molson Gold Medal, for mathematics and natural philosophy; Mr. Ashley won the Shakespeare Gold Medal, for English Language and Literature, and Mr. Bassett, the Logan Gold Medal, for Geology, Mineralogy, and Palaeontology.

Mr. Ashley won the Shakespeare Gold Medal, for English Language and Literature, and Mr. Bassett, the Logan Gold Medal, for Geology, Mineralogy, and Palaeontology.

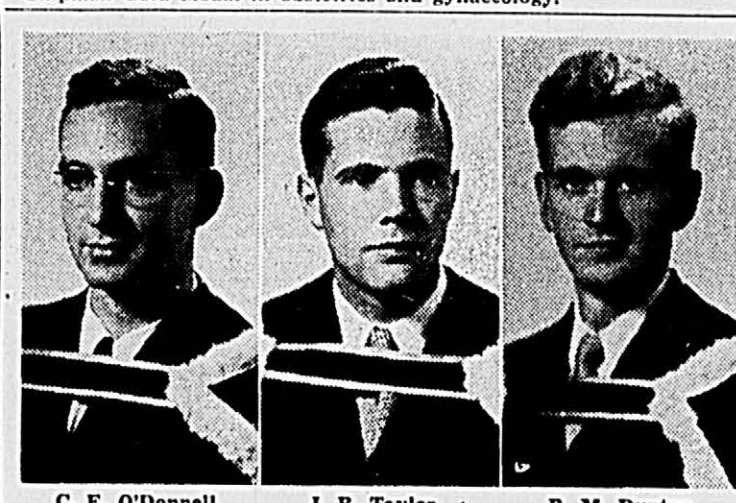

Mr. Bassett won the Logan Gold Medal, for Geology, Mineralogy, and Palaeontology.

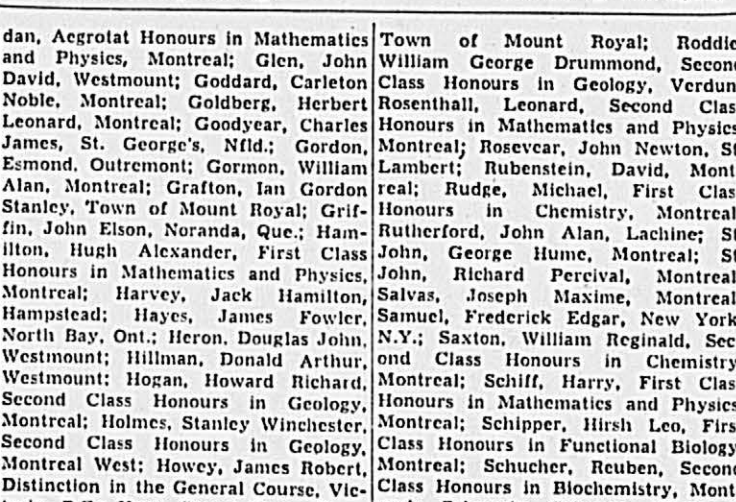

BACHELOR OF SCIENCE—MEN
Adams, Glenn Nelson, Second Class Honours in Mathematics and Physics, Montreal; Alkham, Stuart Percival, Montreal; Allison, John Frederick, Van Kleef Hill, Ont.; Angers, John Wenceslas, St. Lambert; Armitage, Dickson T., Montreal; Aron, Ivan Maurice, Montreal; Atkinson, James Scott, Calgary, Alta.; Austin, Grey Howick, Merivale, Waterford, Hastings, Barbados; Ayres, Stewart Hamilton, Second Class Honours in Biochemistry, Montreal; Baer, Abraham Paul, Second Class Honours in Chemistry, Acme, Alta.; Balfour, Marcel Alter, Distinction in the General Course, Saskatoon, Sask.; Bassett, Henry Gordon, First Class Honours in Geology, Montreal; Beck, David, Distinction in the General Course, Victoria, B.C.; Hunt, Stuart Byron Dawson, Montreal; Hutchison, Roger William, Montreal; Hutchison, James Laurence, Westmount.
Johnson, Allan Keith, Second Class Honours in Chemistry, Montreal; Johnson, Willard Jesse, Second Class Honours in Biochemistry, Montreal; Johnston, David James, Second Class Honours in Chemistry, St. Lambert; Kastner, John William, Montreal; Keene, Michael Gerald, Trevelyan, Halifax, N.S.; Kendall, David Leslie, Montpelier, Vermont; King, Frederick Arnold, St. Johns, Que.; Kushner, Arnold, Second Class Honours in Biochemistry, Montreal; Lalor, Brian, St. Petersburg, Fla.; Lalonde, Charles Franklin, Cornwall, Ont.; Langbein, Manuel Phillip, Second Class Honours in Mathematics and Physics, Montreal; Languedoc, Francois Michel, Errol, Montreal; Lasich, Anthony Robert, Val d'Or, Que.; Latham, David Charles, Thompson, Transvaal; Latter, Arthur Thomas, Montreal; Law, Charles, Second Class Honours in Chemistry, Winnipeg, Man.; Law, Thomas, St. John's, Barbados; Law, William, Outremont; Lay, Ronald Albert, Second Class Honours in Geology, Verdun, Que.; Leavitt, Harry Albert, Second Class Honours in Geology, Verdun, Que.; Leclair, Joseph Jean, Mauricie, Distinction in the General Course, Westmount; Levinson, David, Great Distinction in the General Course, Westmount; Levy, Mortimer, Montreal; Levy, Samuel Wolfe, Montreal; Lewis, John Bradley, Second Class Honours in Zoology, Ottawa; Liddle, Clive Andrew, William, St. Johns, Que.; Loomer, Elijah Isalah, Second Class Honours in Mathematics and Physics, Kingsport, N.S.; Loucks, Donald Arthur, Kempville, Ont.; Lowther, John Stewart, Town of Mount Royal; Lyall, Helen, Second Class Honours in Geology, Montreal; Lyman, Robert Whitney, First Class Honours in Chemistry, Westmount.
McCall, Ian, Winnipeg, Man.; McCallum, John Rowan, Montreal; McDonald, Joseph Edward, Montreal; McEwan, John Ross, Second Class Honours in Mathematics and Physics, Montreal; McEwen, Robert Blair, Distinction in the General Course, Carleton Place, Ont.; MacLaine, Ian Alexander, Second Class Honours in Chemistry, Verdun; Maclean, John Reginald Blair, Montreal; McLeod, Alexander Gordon, Toronto, Ont.; Maas, Colin, Montreal; Marshall, David, Montreal; Marshall, David, Second Class Honours in Chemistry, Westmount; Mason, William Edward, Montreal; Breen, Henry, Distinction in the General Course, Montreal; Moffat, William Wright, Port Colborne, Ont.; Murdoch, James David, Second Class Honours in Chemistry, Verdun; Murphy, Terence Patrick, Montreal; Neal, Jack Laurence, Second Class Honours in Chemistry, Verdun; Neale, Ernest Richard, First Class Honours in Geology, Beaconsfield, Que.; Olson, George Paul, Fort William, Ont.; Ouellet, Joseph Jeffery, Westmount, Mass.; Pallett, Kenneth Franklin, Ottawa; Pallett, Charles Arthur, Shawinigan Falls, B.C.; Parsons, Charles Leslie, Westmount; Pearl, Hyman, Great Distinction in the General Course, Grand Falls, Que.; Pedault, Dawson Edwin, Quebec, Que.; Percy, Edward Charles, Hampstead, Montreal; Popov, Myron, Outremont; Pout, Burton Hugh, Ottawa, Ont.; Pozanski, Jack, Montreal; Purcell, Jacob, Outremont; Rankin, Harold Earl, Ottawa, Ont.; Reiner, Bertram, Regina, Sask.; Renowich, Alexander, First Class Honours in Chemistry, Rosemount, Que.; Robinson, Bruce Robert,

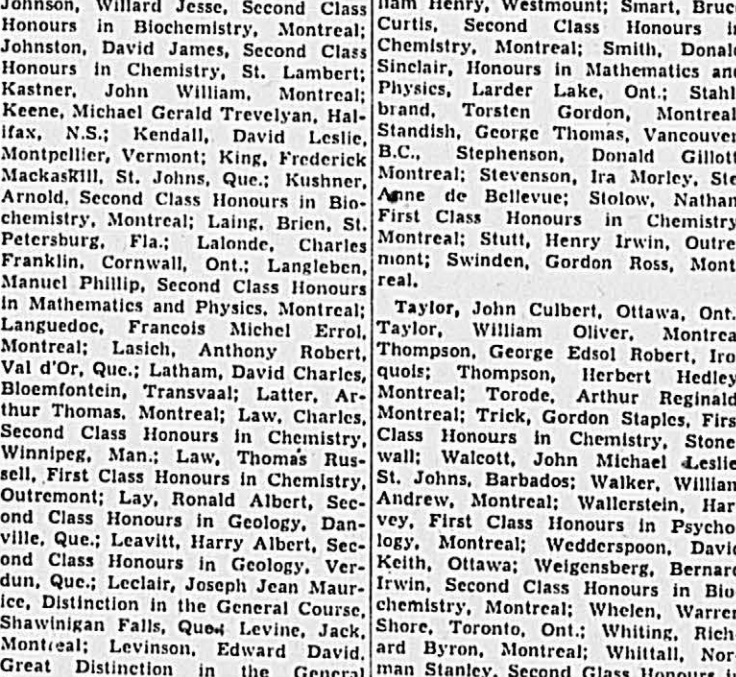

Mr. Cockburn won the Sir Edward Beatty Memorial Medal in Economics awarded in the School of Commerce; Miss Kidwell, Donnellan won the Holmes Gold Medal for highest standing in all subjects in the medical curriculum; Mr. Van Patter receives the Wood Gold Medal for clinical work in medicine, and Walter W. Chipman Gold Medal in obstetrics and gynaecology.

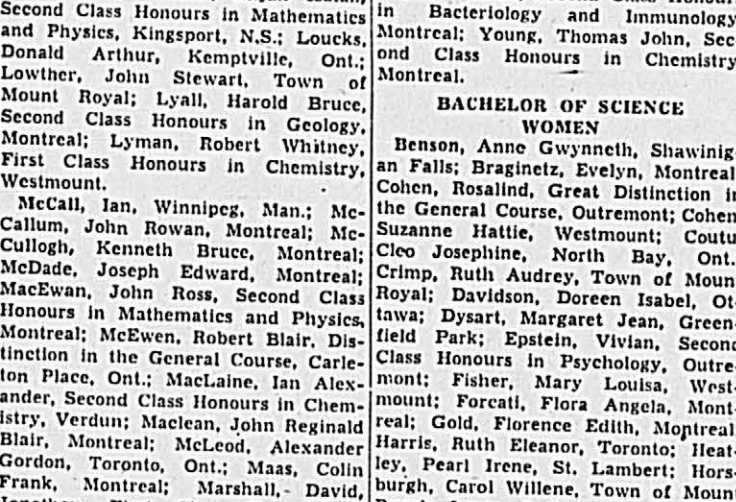

Mr. O'Donnell, University Scholar, won the British Association Medal in Engineering Physics; Mr. Taylor, British Association Medal in Engineering Physics; Mr. Dunton, British Association Medal in Mechanical Engineering.

Mr. Taylor, British Association Medal in Engineering Physics; Mr. Dunton, British Association Medal in Mechanical Engineering.

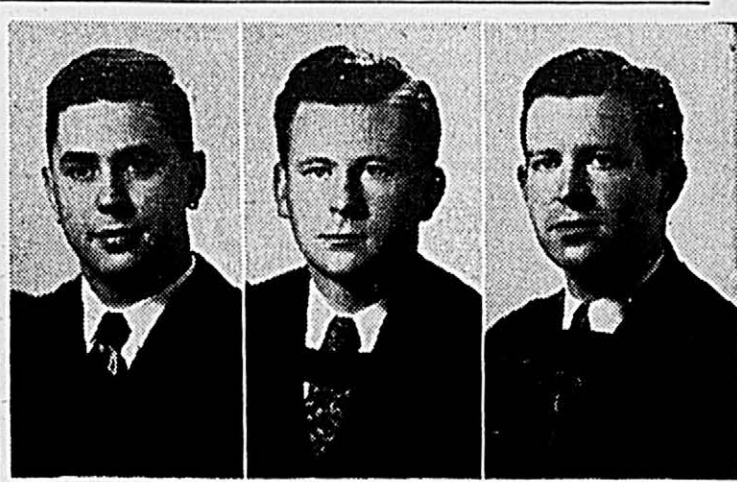

Mr. Dunton, British Association Medal in Mechanical Engineering.

Mr. Rosen won the Lieutenant-Governor's Silver Medal in Health and Social Medicine and J. Francis Williams Scholarship in Medicine and Clinical Medicine; Mr. Piercy won the Robert Forsyth Prize in Surgery; Mr. White won the Campbell Howard Prize in Clinical Medicine.

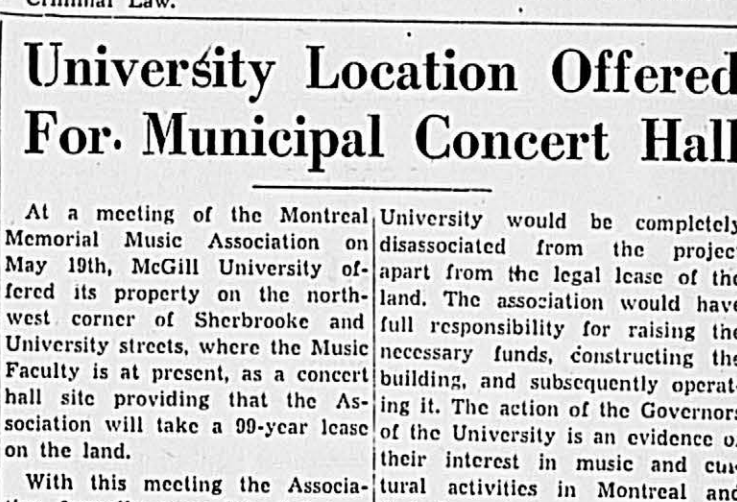

BACHELOR OF SCIENCE—WOMEN
Benson, Anne Gwyneth, Shawinigan Falls; Braginetz, Evelyn, Montreal; Cohen, Rosalind, Great Distinction in the General Course, Outremont; Cohen, Suzanne Hattie, Westmount; Coutu, Colette Josephine, North Bay, Ont.; Crump, Ruth Audrey, Town of Mount Royal; Davidson, Doreen Isabel, Outremont; Dwyer, Margaret Jean, Greenfield Park; Epstein, Victor, Second Class Honours in Psychology, Outremont; Fisher, Mary Louise, Westmount; Forcett, Flora Angela, Montreal; Gold, Florence Edith, Montreal; Harris, Ruth Eleanor, Toronto; Heatley, Pearl Irene, St. Lambert; Horsburgh, Carol Wilene, Town of Mount Royal; Innes, Audrey Hope, Westmount; Irwin, Elizabeth Doreen, First Class Honours in Geography, Verdun; Johnston, Constance Anne, Meriton, Victoria, B.C.; Khouri, Hind, Damascus, Syria; Klein, Miriam Sybil, Ottawa; Koohlot, Natalie Ann, Town of Mount Royal; Kutzman, Lois Helen, Second Class Honours in Psychology, Montreal.
Leahy, Ora Ann, Montreal; Levitz, Irene, St. John's, Nfld.; Lipshitz, Judith, Great Distinction in the General Course, Governor General's Silver Medal, Outremont; Loy, Dorothea Phillips, Hampstead, Que.; Lyall, Marie, Montreal; McDonald, Mary Alicia, Harrison's Corners, Ont.; McGill, Nancy Elizabeth, Westmount; MacLean, Georgina Pictachette, Montreal; West, Macrae, Marian Barbara, Rielville, Que.; Mace, Beverly Ann, Westmount; Mendelsohn, Myra Florence, Second Class Honours in Psychology, Outremont; Merie, Josephine Nancy, Distinction in the General Course, Montreal; Miller, Shifra, Sheffield, England; Morgan, Martha Elizabeth, Westmount; Morrow, Mary, Montreal; Nakashima, Miyoshi, Montreal; Parnell, Sheila, (Continued on Page 3)

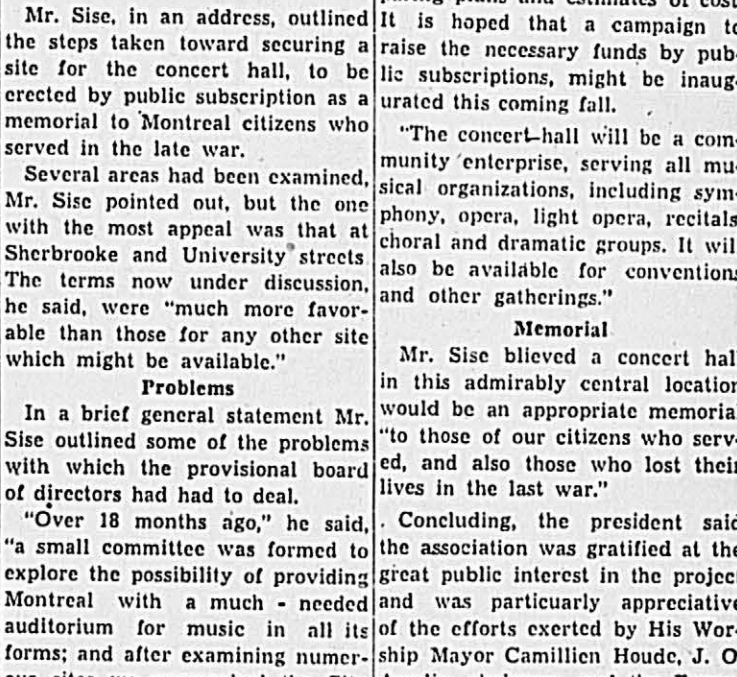

Mr. Piercy won the Robert Forsyth Prize in Surgery; Mr. White won the Campbell Howard Prize in Clinical Medicine.

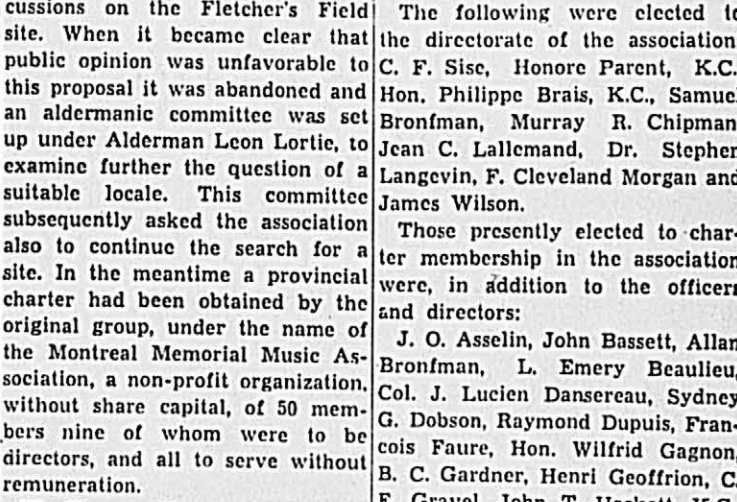

Mr. White won the Campbell Howard Prize in Clinical Medicine.

Mr. Elo won the Montreal Dental Club Gold Medal for highest standing in the science and practice of dentistry; Mr. Howard, the Adolphe Mailhot Prize for second highest standing in final examinations in law and Faculty Prize for Third Year Essay (Public Law); Mr. Graydon, Chief Justice R. A. E. Greenshields Prize in Criminal Law.

Mr. Howard, the Adolphe Mailhot Prize for second highest standing in final examinations in law and Faculty Prize for Third Year Essay (Public Law); Mr. Graydon, Chief Justice R. A. E. Greenshields Prize in Criminal Law.

Mr. Graydon, Chief Justice R. A. E. Greenshields Prize in Criminal Law.

University Location Offered For Municipal Concert Hall
At a meeting of the Montreal Memorial Music Association on May 19th, McGill University offered its property on the north-west corner of Sherbrooke and University streets, where the Music Faculty is at present, as a concert hall site providing that the Association will take a 99-year lease on the land.
With this meeting the Association formally came into being as Charles F. Sise was elected as President, Honore Parent, K.C., vice-president and Pierre Beique, secretary.
Mr. Sise, in an address, outlined the steps taken toward securing a site for the concert hall, to be erected by public subscription as a memorial to Montreal citizens who served in the late war.
Several areas had been examined, Mr. Sise pointed out, but the one with the most appeal was that at Sherbrooke and University streets. The terms now under discussion, he said, were "much more favorable than those for any other site which might be available."
In a brief general statement Mr. Sise outlined some of the problems with which the provisional board of directors had had to deal.
"Over 18 months ago," he said, "a small committee was formed to explore the possibility of providing Montreal with a much-needed auditorium for music in all its forms; and after examining numerous sites we approached the City of Montreal for a piece of property in the neighborhood of Park and Pine avenues."
The president recalled the discussions on the Fletcher's Field site. When it became clear that public opinion was unfavorable to this proposal it was abandoned and an ad hoc committee was set up under Alderman Leon Lortie, to examine further the question of a suitable locale. This committee subsequently asked the association also to continue the search for a site. In the meantime a provincial charter had been obtained by the original group, under the name of the Montreal Memorial Music Association, a non-profit organization, without share capital, of 50 members, nine of whom were to be directors, and all to serve without remuneration.
Mr. Sise mentioned other properties the provincial board had examined, among them different sites on the Canadian National Railways Central Station development. Negotiations were carried on with the Railway on a 99-year lease basis; but when the availability of the McGill site became known, this presented itself as the most attractive so far studied.
"McGill University is prepared to lease that portion of its property at the north-west corner of Sherbrooke and University streets," he said, "comprising an area of 46,800 square feet, to our association as a site for a concert hall. While negotiations have not been concluded it would appear that arrangements can be made for the acquisition of this site on a 99-year lease on terms which could be much more favorable than those for any other site which might be available."
"If we can agree on terms, the University would be completely disassociated from the project apart from the legal lease of the land. The association would have full responsibility for raising the necessary funds, constructing the building, and subsequently operating it. The action of the Governors of the University is an evidence of their interest in music and cultural activities in Montreal and their keen desire to assist."
"In the meantime the association's architects, Messrs. E. I. Barrot and Ernest Cormier, are preparing plans and estimates of cost. It is hoped that a campaign to raise the necessary funds by public subscriptions, might be inaugurated this coming fall."
"The concert-hall will be a community enterprise, serving all musical organizations, including symphony, opera, light opera, recitals, choral and dramatic groups. It will also be available for conventions and other gatherings."
Mr. Sise believed a concert hall in this admirably central location would be an appropriate memorial "to those of our citizens who served, and also those who lost their lives in the last war."
Concluding, the president said the association was gratified at the great public interest in the project and was particularly appreciative of the efforts exerted by His Worship Mayor Camille Houde, J. O. Asselin, chairman, and the Executive Committee, and the special committee of City Council under the chairmanship of Alderman Leon Lortie.
The following were elected to the directorate of the association: C. F. Sise, Honore Parent, K.C., Hon. Philippe Brail, K.C., Samuel Bronfman, Murray R. Chipman, Jean C. Lallemant, Dr. Stephen Langevin, F. Cleveland Morgan and James Wilson.
Those presently elected to charter membership in the association were, in addition to the officers and directors:
J. O. Asselin, John Bassett, Allan Bronfman, L. Emery Beaulieu, Col. J. Lucien Dansereau, Sydney G. Dobson, Raymond Dupuis, Francois Faure, Hon. Wilfrid Gagnon, B. C. Gardner, Henri Geoffroy, C. E. Gravel, John T. Hackett, K.C., M.P., H. E. Herschorn, George Hobart, R. P. Jelliet, Frederic Johnson, R. O. Johnson, H. Lank, Mostyn Lewis T. H. P. Molson, W. P. O'Brien, Alfred H. Paradis, Hon. Esiof Pelencade Lazarus Phillips, R. E. Powell, Hon. Alphonse Raymond, Senator Donat Raymond, Paul Vaillancourt, Senator Thomas Vail, H. G. Welsford.
Other nominees have yet to be heard from.
PRIZES AWARDED
University authorities announced recently the winners of the two Chester Macnaughton prizes for creative writing.
The winner of the first prize was Donald Purcell, of Pleasantville, N.Y., who is completing his first year in the department of English. Donald G. Smith, third year arts student from Ottawa, won the second prize.

James Writes McGill Article for Britannica

F. Cyril James, principal and vice-chancellor, McGill University, is among the contributors to the 1949 Britannica Book of the Year, according to Walter Yust, editor-in-chief of the Encyclopaedia Britannica publications. Dr. James contributed the article on McGill University.

The Britannica Book of the Year is the annual summary of the preceding year's major events and discoveries published by the Encyclopaedia Britannica, Inc. It is a source book of current information, and an aid to owners of the Britannica in keeping up to date.

It contains almost one million words written by 600 outstanding contributors from the fields of industry, government, science, and education.

NOTICE

Four straw hats and one wig were left in the Union during the Laval week-end of March 25-27.

Anyone finding such, please return to the Tuck Shop in the Union. The articles were rented for the Laval show and have to be returned.

Historic Portrait Presented to McGill

A portrait of the first principal of McGill, Bishop George Jehaphat Mountain, who took office 120 years ago next June, has been given to the university. It was announced recently by Dr. F. Cyril James.

The portrait, painted by a noted Montreal artist, John Fraser, was made of Bishop Mountain shortly after he took office as McGill's first principal and vice-chancellor.

The painting was given to the university by J. G. G. Kerry of Port Hope, Ont., a direct descendant of Bishop Mountain, who also presented to the University a portrait of Mrs. Joseph Mountain, mother of the first principal, and another portrait of Bishop Mountain done later in life.

LIST OF GRADUATES

FACULTY OF AGRICULTURE BACHELOR OF SCIENCE IN AGRICULTURE

Arsenault, Jean Albert, Grand Etang, N.S.; Arthur, Alfred Pius, Knowlton, Que.; Banks, John Stanley, Waterbury, N.S.; Barwise, David Harold, Charlottetown, P.E.I.; Bashaw, Herbert Edward, Three Rivers, Que.; Beaudet, Jacques, Thetford Mines, Que.; Bingham, Carl Woodrow, Estherville, Alta.; Bradley, Keith Traver, Mansonville, Que.; Brittain, William Bruce, Macdonald College; Burgess, Ralph Christopher, Verdun; Burgess, William Albion, Grand Falls, N.B.

Carr, Joseph William, Huntingdon, Que.; Chambers, Leonard David, Sussex, N.B.; Channon, John William, Macdonald College; Charrette, Fernand, Gatineau Point, Que.; Chase, Stephen Cogswell, Port Williams, N.S.; Clark, Erle Gordon, Clarenceville, Que.; Clark, Jean Aline (distinction) Mountain, Ont.; Clark, Robert Vernon, North Wiltshire, P.E.I.; Clarke, Michael, Barbados, Cook, James Leo, River Charles, N.B.; Cooper, Ashleigh Venn, Westmount; Craig, Hugh Morton, Quebec; Creed, Murray Preston, Highfield, P.E.I.

Day, Helen Mary, Montreal; Deacon, Frank Morris, Freetown, P.E.I.; Desrosiers, Pierre Claude, Outremont; Dickson, John Hayes, Rothessay, N.B.; Doucette, Lawrence Everett, Rollo Bay East, P.E.I.; Doyle, James John, N.E. Mabou, N.S.; Elliott, Bernard Burton, Macdonald College; Ellis, John Murray, (St. John's), Howick, Que.; Fairbairns, David Keith, (distinction) Macdonald College; Fontaine, Lucille, Fulford, Que.; Fraser, Vernon Albert, Elmira, P.E.I.; Fuller, Langdon Victor, Macdonald College; Garland, John William, Baddeck Forks, N.S.; Gluck, Manuel, Brockville, Ont.; Goulet, Carl Oscar, Stewiacke, N.S.; Graves, David Graham, Bridgeport, N.S.; Grisdale, John Hiram, Ottawa; Gunn, James Donald, Scotsburn, N.S.

Hansen, Douglas Reginald, Grand Falls, N.B.; Harding, Charles Frederick, Macdonald College; Headrick, Aubrey Grant, Glace Bay, N.S.; Heaney, Harold Blair, (great distinction) Macdonald College; Henry, Charles Edward, (in absentia) (distinction) Bridgeport, N.S.; Herbert, Helen, (distinction) St. John's, N.S.; Keele, Thomas Joseph, Macdonald College; Kelzer, Frederick Lester, Charlottetown, P.E.I.; Kelley, Russell, Allison Maclean, Macdonald College; Kerr, Ian Lewis Glenon, Montreal; Lane, Eric Starr, Truro, N.S.; Langille, Austin Bruce, Truro, N.S.; Langille, James Edward, Truro, N.S.; Lindsay, Allan Scott, Renfrew, Ont.; Lockhart, Donald Ashton, Montreal; Lockhart, Ralph Deane, Hillsboro, N.B.; Loiselle, Roland, Verdun; Lutwick, Laurence Everett, Ste. Anne de Bellevue; McAteer, Allan James, Cornwall, Ont.; McConnell, Hugh St. Clair, St. Vincent, B.W.I.; MacGregor, Thomas Proctor, Belleisle Creek, N.B.; MacKay, Alastair Fraser, Picton, N.S.; MacKey, Allister MacKenzie, Scotsburn, N.S.; McLaughlin, John Murray, (distinction) Macdonald College; MacLeod, Harry Alfred, Truro, N.S.; MacLeod, John Leslie, Montreal; MacLeod, Myrtle Elizabeth, Charlottetown, P.E.I.; MacMillan, Mary Phyllis, Charlottetown, P.E.I.; Maxwell, Thomas Milligan, Ottawa; Merritt, Edison Stanley, Saint John, N.B.; Morgan, Gerald Claude, St. John's, N.B.; Morrison, Clifton Robert, Lachute, Que.; Moss, Robert Ivan, Camden, N.J.

Nicholson, Frank Daniel, South Side Baddeck, N.S.; Nicholson, William Wallace, South Side Baddeck, N.S.; Norris, Frederick Mansfield, Montreal; Palfrey, George Donald, Picton, N.S.; Parmelee, John Aubrey, Ottawa; Peacock, Stephen David, Bayfield, N.B.; Phillips, Colin MacLean, Truro, N.S.; Pritchard, Joseph Paul, Town of Mount Royal; Ralph, William Herbert, Montreal; Redcliffe, Walter Robert, Richmond Hill, Ont.; Reeves, Alfred John, St. Lambert, Que.; Robinson, Ian Stanley, Barbados, B.W.I.; Rogers, David Clyde, Stewiacke, N.S.; Ross, Robert Gordon, Truro, N.S.; Roy, Donahoe, Macdonald College; Sanchez, Rodolfo S., Salto, Coah. Mexico; Scott, David Gibson, (distinction) Ottawa, Ont.; Seovil, Harold Raymond, Queenstown, N.B.; Scrivens, William Bruce, Ottawa, Ont.; Shamovitch, Isaac, Montreal; Sibals, Jack, Montreal; Slater, Douglas Tory, Roachville, N.S.; Smith, Gerald Austin, (Cutter Shield), Ormoco, N.B.; Smith, James Ronald, Diligent River, N.S.; Stairs, Harold Fraser, Fredericton, N.B.; Standish, Angus Gilbert, Cookshire, Que.; Stead, Geoffrey Richard, Saint John, N.B.; Stevenson, George Kelvin, Campbell Bay, Que.; Swaby, Leicester Keith, Jamaica, B.W.I.

Tatler, Neil Herbert, Belmont, N.S.; Taylor, Aston Rupert, Jamaica, B.W.I.; Vickary, Vernon Randolph, (Lochhead Memorial Prize) South Ohio, N.S.; Vivian, Albert, Port Renfrew, Nfld.; Walter, Arthur Maria, Macdonald College; Wan Ping, Ashton Victor, Georgetown, Br. Guiana; Waterston, Grace Patricia, Westmount; Whittaker, Francis Arden, Kenmore, Ont.; Williams, Arthur Ben, Charlottetown, P.E.I.; Wilson, James Douglas, Ste. Anne de Bellevue; Yeo, Lawrence Boyd, Central Lot 16, P.E.I.

1st, 2nd AND 3rd YEAR RESULTS
Results of first, second and third years final examinations in the faculty of agriculture and school of household science at Macdonald College have been issued.

The Lieutenant-Governor's silver medal in first year agriculture was won by D. H. Macaulay, K. A. Walsh won the Governor-General's bronze medal in second year, also the I.O.D.E. scholarship.

Thelma J. Clarke, in second year school of household science, was awarded the Lieutenant-Governor's bronze medal.

In the diploma course in agriculture, D. T. Lister in first year won the Lieutenant-Governor's bronze medal. La Ferme prize in second year was awarded jointly to L. R. Martin and J. R. Tully. Mr. Martin also shared with P. R. Ronald in the award of the Minister of Agriculture's medal. The special prize from the Department of Agriculture was won by F. R. Burns.

The results, which follow are given alphabetically, each "x" indicating that a supplemental examination is required:

Students Will Help Frontier College Work

Under the supervision of the Frontier College, a number of McGill students will spend their summer vacation among men working in the bush, on railway and construction gangs, and in mines in the outlying regions of Eastern Canada. They will work with the men during the day, and in the evening conduct informal classes.

Two McGill students who have already volunteered their services for this summer are Jack Scott and Charles Hannan. Bob Wild, fourth year arts student, who taught English to a railroad gang of D.P.'s while working with them last summer, is in charge of recruiting this year. It is expected that at least three more students will apply.

Frontier College, with headquarters in Toronto, sends from 60 to 80 male students from Canadian universities each year to do labour-teaching work. It is supported by private subscription and is under the patronage of Viscount Alexander.

In the way of payment, students will receive the regular wages paid for the labour they do, plus a small bursary from the college for their teaching.

Ruth Peltier Named To Placement Service

Miss Ruth Peltier, who was office manager for the Graduate Society, has taken over the position of Assistant Director of the Placement Service, formerly held by Miss Rossiter. Miss Rossiter is leaving for another position.

Miss Peltier is a McGill graduate, holding a Bachelor of Arts degree. She served during the war with the Women's Royal Canadian Naval Service, and was retired with the rank of Lieutenant. For the past two years Miss Peltier was office manager for the Graduate Society Headquarters. She took over as assistant to the director of the Placement Service last May 15.

Miss Peltier requested that attention be drawn to Placement Service notices, found elsewhere in the Daily, concerning both graduates and under-graduate students.

Note: Engineering, Commerce Graduates

It is essential that you leave with the Placement Service a record of your present employment. Report Forms are available for this purpose, either in the Placement Service Office or from your class executive.

If these forms are not completed it may prejudice your chances for other employment in the future.

C. M. McDOUGALL,
Director,
McGill Placement Service.

LIST OF GRADUATES

McGill Swimming Squad Enjoys Successful Season

Hailed As Greatest Team Ever To Wear The Red and White

Adin Merrow Awarded Forbes Trophy

In 1949 a McGill swimming team which had been hailed as one of the greatest ever to represent the University won the C.I.A.U. championship. The victory scored at Toronto ended a thirteen year Varsity stranglehold on the swimming crown and climaxed a most successful year for the Red Mermen in the natatorial wars. The McGill team in the past season, facing some of the foremost U.S. swimming powers such as Connecticut, Springfield and Amherst, posted an impressive 8-2 record and established new Canadian records in a number of events.

WIN C.I.A.U. CROWN
The squad routed a Quebec All-Star team in a dual meet and won all four events which it entered in the Quebec City Championships. In the C.I.A.U. title meet, the Red Mermen won eight of the nine events of the contest and broke four of the eight existing collegiate swimming records. By the amazing showing of the past year McGill has catapulted itself into a position of prominence in the North American swimming scene.

ADIN MERROW
Above is shown the record setting swimming sensation of the Red Mermen who swept to the Canadian Intercollegiate Championship.

Ex-Bowdoin College Star Breaks 5 Dominion Records

The Forbes Trophy, annually awarded to the athlete who has brought most credit to the University, was awarded this year to swimmer Adin Merrow. Adin was the spearhead of a McGill team which posted an .800 win mark, broke hordes of records and won the C.I.A.U. championship. Backstroke Merrow competing for the first time under McGill colors, set new Canadian records for the 100, 150, 220, and 440 backstroke events; for the 440 yd. freestyle event; and was a member of the 300 yd. Dominion Medley Relay championship trio.

His excellent conditioning enables him to swim tremendous distances backstroke and to defeat crawl men. This feat performed in the 440 yd. freestyle at the championships brought a huge burst of applause from the crowd, when he set a record on his back in winning against five crawl men. Adin is a member of Zeta Psi fraternity which he first entered at Bowdoin College. The Forbes Trophy could have gone to no athlete more deserving than McGill's record-smashing "Ironman" of the tank, the amazing Mr. Merrow.

JACK GRIFFIN
Pictured above is Jack "Porky" Griffin, the Redbirds' hickory whiz. Jack captured the Interfaculty Downhill and Slalom titles. He also gave McGill their only major trophy win in the Internationals when he annexed the Slalom crown at Banff.

Women's Associates Meet, Elect Officers

Mrs. C. H. Carruthers has been re-elected president of the Women's Associates of McGill. Other officers chosen at the annual meeting held at the Faculty Club were: vice-president, Mrs. G. E. Wallace; secretary, Mrs. Gordon MacL. Pitts; corresponding secretary, Mrs. J. C. Simpson; treasurer, Mrs. L. P. Ereaux.
New York—(UP)—Mrs. Fanny Blankers-Koen, who equalled Jesse Owens' record when she won four gold medals in the 1948 Olympic games, holds world records in the high jump and broad jump, two events in which she did not compete in the Olympics. She has topped the women's international high jump standard to 5-feet, 7 1/4 inches and the broad jump to 20-feet, 6-inches.

MY-HOW SMART YOUR HAIR LOOKS!

THANKS TO BRYLCREEM!

Sold everywhere in handy tubes

There's nothing like well-groomed hair to improve your appearance—and make a hit with the girls! That's why BRYLCREEM is so popular with men everywhere... why it is the largest selling hair dressing in Canada! It instantly makes your hair smooth, well-groomed, attractive—without being smelly or greasy.

GIRLS—Brylcreem is an excellent dressing for your hair too—try it!

ful vigor and keen knowledge of swimming to work. He could not produce a miracle overnight and Toronto beat his teams in the first four title tilts in which he guided the mermen. His modern methods, precision training and teaching enthusiasm however were apparent even in defeat, as our teams began challenging with more drive. One of Vic's teams were turned back by the margin of a single point at Toronto. But he had the spirit with which to gain the crown for McGill and he fused it into his team. The night of March 27 in Toronto

VIC CURRAN

IRWIN KOPIN

Merrow attended Bowdoin College in New England and was graduated with a B.A. degree. At Bowdoin he was captain of the freshman swimming team and captained the senior squad for two years.

He is a very versatile swimmer, holding the New England Intercollegiate Individual medley crown. This event consists of going 300 yds. using three different strokes. Performing for McGill he has been our "Ironman," racing in the medley relay, and 220 and 440 yd. freestyles in most meets. He led the McGill team in total points scored and at the C.I.A.U. title meet at Toronto led all swimmers with 12 points.

In the recent war, he served with the U.S. Army Medical Corps, and saw action in France, Italy and Germany for three years. His main interest has always been in the field of Medicine and his army work intensified this interest to the point of making it his career. Next year Adin will enter the McGill Medical School.

Swimming began early for Merrow. At the age of seven he learned to swim at a hometown YMCA in Nyack, N.Y. Because his stroke depended so much on power, he was advised he would never make good in the water sport. His power has sustained him, however, and today "good" is a modest appraisal of Mr. Merrow's talents. He was an inspirational leader to the team this year. He is a veteran of many swimming contests and his knowledge of pacing a race has greatly enhanced his value to the team. If he sees he can win the race in which he has entered, he conserves his strength for the next event. He usually was entered in three events per meet. This is the maximum which the rules permit. He is a very hard worker. His practice when in training includes at least a mile of swimming every day.

Because of his cool judgment, great talent, inspiring performances, and because all the boys think he's a swell guy, Adin was elected captain of the squad for

and came in second to Merrow.

MINGIE SHINES
Pete Mingie, Canadian Olympic backstroke, in his initial year under the McGill banner, broke the 100 yard backstroke record at the title meet and he too came in second behind Adin Merrow. Adin set two records and participated in a third on the same night at the Toronto championships. Irwin Kopin, a 220 pound "flying breast-stroker," made the Red Mermen unbeatable in this event. The "Red Seahorse" came within less than two seconds of the record at Toronto. The team was deep in talent. Jim Quayle won the 50 yard freestyle and Stan Christie took the 100 yard freestyle title at Varsity.

Greg Titus took the 220 freestyle and Irwin Kopin the 220 yard breaststroke. The University fields a team of which it can be justly proud. Under the able hand of a coach of Vic Curran's ability it should continue to be an array of title talent. Perhaps Toronto may not see the swimming title returned so soon.

A Word To The Wise: Beware Mr. St. Laurent

Oxford, England. — While Prime Minister Attlee was dining as a private guest at Oriel College recently, undergraduates stuck a handbill reading "Vote Tory next time" in the band of the hat he had left in his automobile. They also fastened the car with

Skiers Sparked by Jack Griffin Have Banner Campaign

As a public service to all loyal ski fans at McGill we take pleasure in offering the following aids for reminiscing over a ski season that almost headed the list in awards won in the field of sport for the glory of old McGill in 1948-49.

From the typewriters of skiscribes Barbara Watson, Andy Huggessen and Bob Graham flowed something like this... McGill men, never slow to answer the call of the cool crystals, turned out way back in November to the training camp at Mont Tremblant. Here, under the watchful eye of Coach Vic Allen, fifteen prospective team members ironed out their ski technique and got into top physical condition for the coming season's grind.

Some indication of their ability came to light with the staging of the McGill Interfaculty Races at St. Sauveur. Here blanketed by fresh powder snow the Redbird trail remained in perfect condition under the skis of some 38 male and 13 co-ed competitors. Jack Griffin took top honours in both downhill and slalom in the men's division, while Joanne Hewson won the co-ed's downhill and Rosemary Shultz led the girls in the flag jaunt. The first big meet of the season gave the Intermediates a chance to show their skill when they retained the U of M trophy, symbolic of C.I.A.U. skiing supremacy, for their third consecutive year by defeating eight other universities in the championships held at North Hatley Quebec. The team's win was sparked by the brilliant efforts of Andy Huggessen whose ability and stamina netted him the Nordic Award plus the Bishops University Trophy, given to the participant with the highest aggregate.

The Norwegian events of jumping and cross country were the deciding factors in the Red and White's final victory over the University of New Brunswick. It was not until the excellent showing of Bill Dawson and Andy Huggessen on the jump along with the team's domination of the cross country that victory was assured. John Fry's "technique" on the

Tory placards. When Attlee's chauffeur and his personal detective returned to the car after dinner, they found it had no pump. Some undergraduates compensated for the mischief making by blowing up and replacing the tires.

"Old McGill"

Your Annual is waiting for you. It must be picked up at the S.E.C. office in the Union. Annuals will not be mailed.

For the last 50 years students wending their way down to the Roddick Gates and Sherbrooke street have been confronted by Strathcona Hall and have taken it for granted. Now it is to become a military headquarters and probably more attention will be directed towards it, especially by the feminine section of the campus, who will no doubt find it hard to ignore the military personnel.

'Willie' Recalls 25 Years As Strathcona Hall Closes

By ROSEMARY GRAVINA

Strathcona Hall is folding up, even though Strath will no longer be part of the university next year. After fifty years as a focal point of campus activities, the building that was home to countless students through the years has been sold to be used as a military headquarters. Strath has, at various different times, been inhabited by both men and then women students.

It was originally turned over to the SCM by the YMCA, and gradually became a part of McGill tradition. Students of all faculties lived in the building until approximately '41 or '42 when it was used by the teacher's School, due to a military infiltration at Macdonald college. When Mac was returned to the University and the teachers returned to their own property, Strathcona Hall became a women's residence for the overflow from RVC.

But whatever Strath has been in the past, and whatever changes it has undergone, one person there has always remained, Willie MacInnes, who has been at Strath for twenty-five years this May, will always be unforgettably linked with the building by all the students who have ever lived there.

Bishop Whelan Will Sing Mass For R.C. Grads

The Holy Sacrifice of the Mass will be celebrated in the Sacred Heart Convent Chapel at 9.30 a.m., Sunday, May 29, to mark convocation for the more than 400 Roman Catholics in the graduating class of 1949.

Sponsored by the Newman Club at the request of the Convocation Committee, the Mass will be sung by his Excellency Bishop Whelan who will also address the graduates. Caps and gowns will be worn. For those out of town students who are still unfamiliar with Montreal the committee points out that the Sacred Heart Convent is situated on Cote des Neiges Road at the corner of Atwater.

The Newman Club executive also wish to announce that Newman House will remain open all summer and a schedule of activities has been drawn up to include dances, cycling trips and roller skating parties.

All those who are interested are invited to drop in or phone Newman House at BE. 4088 for further information. The clubhouse is located on McGill College Avenue next door to Poole's Book Store.

Willie can recall the time when McGill had no Roddick Gates, and the campus was encircled by an iron fence patched here and there with bits of baling wire. He will tell you about the days when the football team practiced on the Lower campus, and used the shower room in Strath, which was the only one available.

Many of the professors lived at Strath during their undergraduate days, and they too remember Willie as the person who gave them advice when they needed it, settled arguments kept the peace and did just about everything else there was to be done around Strath.

Willie has truly become a well loved figure around McGill, and

O'Neill, Thomas Lionel, Bland, Quebec City; Reid, Beryl Anne, Montreal; Reid, Douglas Graham, Kingston, Ont.; Roscoe, Ina Mayne, Winnipeg, Man.; Rutherford, Alice Elizabeth, Saskatoon, Sask.; Smith, Elmer Vincent, Webster's Corner, P.E.I.; Spratt, Albert Alfred, Saskatoon, Sask.; Starzewski, Janet Eleanor, Winnipeg, Man.; Walsh, Andrew, Belleville, Ont.; Whitridge, James Pope, Regina, Sask.

SCHOOL OF SOCIAL WORK

BACHELOR OF SOCIAL WORK
Dugal, Madeleine Louise, Montreal; Garber, Ralph, Montreal; Goldner, Jack, Montreal; Simpson, Margaret Agnes, London.

FACULTY OF GRADUATE STUDIES AND RESEARCH

MASTER OF SOCIAL WORK
Clement, Edith Margaret, Lewis, Ottawa; Dean, Rena Lois Marie, Indianapolis, Ind.

MASTER OF ENGINEERING
Attas, Isaac, Athens, Greece; Bennett, John Robert Gordon, Montreal; Boire, Paul Charles, Montreal; Godfrey, Gerald Frank, Sidney, B.C.; Goudy, John Francis, B.A.Sc. (Toronto), Toronto, Ont. (Chemical Engineering); Govindaraj, Sadasiva, Calcutta, India; Kiang, Tsch-Kia, Chungking, China; Marshall, James Lawrence, Verdun, Nachfolger, Nain, Montreal; Rieux, Philip Gregory, Ottawa, Ont.; Roach, Charles Lawrence, St. Lambert, Que.

MASTER OF SCIENCE
Antrobus, Edmund Shakerley Alexander, Johannesburg, So. Africa; Black, Philip Thomas, Ottawa; Boswall, Graeme Wyatt, Charlottetown; Burbidge, Frederick Edward, North Saskatchewan; Campbell, Charles Gordon, Vancouver; Carder, Alfred Cecil, Beaverledge, Alberta; Carter, Sharon Elizabeth, Montreal; Chapman, John Herbert, London, Ont.; Chapman, Robert Prince, Moncton, N.B.; Cinq-Mars, Lionel, Montreal; Connell, Robert, Aberdeen, Sask.

Davis, Gordon Richard, Furst, Prince Albert, Sask.; Eadie, Frank Stewart, Montreal; Eakins, Peter Russell, Montreal; Fiskell, John Garth Austin, Elk Lake, Ont.; Glegg, Keith Cecil Malcolm, Kingston, Jamaica; Gonsior, Harry, Montreal; Griesbach, Leonard,

Fredericton, N.B.; Hawirko, Roma Zenovea, Winnipeg; Hodgson, William Arnold, Charlottetown, P.E.I.; Hopkins, Nigel John, Verdun, Que.; Jaffe, Frederick Albert, Montreal.

Karn, Gordon MacCorquodale, Westmount; Kite, William Casper, Jr., Oklahoma City, Okla.; Lachance, Robert Andre, Quebec City; Langerman, Helen Louise, Johannesburg, So. Africa; McDougall, David James, Montreal; McLennan, Hugh, Montreal; Margolis, Bernard, Montreal; Metrakos, Julius Demetrius, Montreal; Meyer, John Stirling, Montreal; Novick, Seymour, Chicago, Ill.

PAWLIKOWSKA, Anna Maria, Montreal; Rattray, Basil Andrew, Montreal; Rigby, Elizabeth Caroline, Montreal; Scott, David Paul, Montreal; Stock, John Joseph, B.S.A. (Ontario Agricultural), St. Thomas, Ont.; Storey, Winnifred Florence, Outremont; Tennant, Alan Dawson, Ottawa; Trossman, Walter Arnold, Outremont; Veilleux, Brendan Michael, Sherbrooke, Que.; Wallen, Victor Reid, Ottawa, Ont.; Ziegler, James Elias, Kansas.

MASTER OF ARTS

Blaseik, Frank, Beauharnois, Que. (Psychology); Block, Victor Richard, Montreal; Coultis, Rosa Jane Blanche, Wardlow, Alberta; DeSjield, George Damon, B.A., (Sir George Williams), Montreal, (Psychology); Flower, George Edward, B.A. (McGill), Montreal (Education); Fox, Leslie Pamela, B.A. (McGill), Natal, South Africa, (History) in absentia; Geggie, Mary Margaret Miller, Montreal; Ghent, Lila Rosenzweig, Montreal; Goodin, Peggy Louise, Bluffton, Indiana.

Hampson, Harold George, Montreal; Harding, Lawrence Arthur Annesley, B.A. (McGill), Bradford, England (English) in absentia; Hawkins, Stuart Christopher MacLean, Montreal; Hepburn, Johnston Sumner, Norwood, Mass.; Holmes, Antony Frederick, West Vancouver; Howell, Helen Marie, Rockford, Ill.; Lambeck, Hanna Weiss, Caracas, Venezuela; Levine, Albert Norman, Ottawa; MacCallan, William David, Hertford, Herts., Eng.; MacIntosh, Robert Mallory, Stanstead,

Que.; Mishkin, Mortimer, A. B., Fitchburg, Mass.
O'Sullivan, Timothy, B.A., Milltown, Co. Kerry, Eire; Potter, Harold Herbert, Montreal; Pratt, Audrey Eleanor McKim, Vancouver.

Purcell, Donald, Pleasantville, N.Y.; Rankin, Winston Bertram, Georgetown, Br. Guiana; Richard, Onell Joseph, Thibodaux, La.; Stewart, Mary Isabella, Montreal; Wearing, Parker Lovell, Montreal; Wilson, James Dunlop, Montreal.

DOCTOR OF PHILOSOPHY

Adelstein, Peter, Montreal; Alcock, Norman Zinkan, Deep River, Ont.; Anderson, Donald Arthur, Sackville, N.B.; Arthur, Marion Elizabeth, Montreal; Brady, George William, Quebec City; Carruthers, James Alexander, Guelph; Christie, George Loyal, New Westminster, B.C.; Dodds, John William, Montreal; Douglas, Donald George, Montreal; Eager, Richard Livingston, B.E., M.Sc., Kenaston, Sask.

Funt, Boris Lionel, Halifax; Gilbert, Joseph Evan Josaphat, Quebec City; Goring, David Arthur Ingham, Montreal; Gross, Jack, Montreal; Halpern, Jack, Montreal; Harwood, Victor Douglas, Montreal; Hemikson, Helen Amy Winter, Montreal; Hodgson, Gordon Wesley, Dewberry, Alta.; Hubley, Charles Emerson, Dartmouth, N.S.; Hymovitch, Bernard, Montreal.

Irvine, George Norman, Winnipeg; Jooste, Rene Francois, Johannesburg, So. Africa; Kianke, Mary Jeanne, Jamesville, Minn.; Khan, M. Abdul Basir, India; Kristjanson, Arnthor Marino, Wynward, Sask.; Logan, Charles Donald, St. John, N.B.

McConnell, Wallace Beverly, Millet, Alberta; McMurray, Gordon Aylmer, Lenoxyville; Mahoney, Gerald Maurice, Montreal; Milne, Donald Johnston, Regina; Palmer, Walter McKinnon, Montreal; Perlin, Arthur Saul, Sydney, N.S.; Pinsky, Alex, Montreal; Robertson, Alexander Allen, Edmonton, Alberta; Roxborough, James Maxwell Jr., Edmonton, Alberta; Saffran, Murray, Montreal; Schofield, Peter Gordon, Newport, Mon., Gr. Britain; Shaw, Michael, Barbados; Tonks David Bayard, Cumberland, B.C.

60 YEARS OF ACCOMPLISHMENT

1889 1949

In the years following 1889, the cycling craze swept this continent. Men and women, both young and old took to wheels. For the first time, people began to see the country, and a demand arose for better roads. The development of automobile transportation in the present century was made possible by further expansion of our highway system and the use of Nickel alloys for important parts of automobiles. The use of these stronger, tougher alloys greatly reduced breakdowns and made the automobile safe and reliable.

How Nickel Benefits Canada

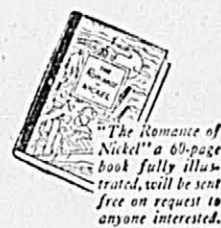

Since more than ninety per cent of the Nickel produced in Canada is sold to the United States and other countries, it brings a constant flow of dollars back to Canada. In fact, Canada's Nickel industry is one of our chief sources of U.S. dollars so essential at the present time to maintain our foreign trade and make available products not produced in this country.

These dollars help pay the wages of the 14,000 Nickel employees, and help provide the dollars which make it possible to pay millions in freight to Canadian railways, to buy timber, steel, coal, machinery and supplies amounting to many millions each year. These millions, flowing into all industries through the length and breadth of Canada, help create jobs for Canadians.

CANADIAN NICKEL

FIRST PRODUCED IN CANADA IN 1889

THE INTERNATIONAL NICKEL COMPANY OF CANADA, LIMITED, 25 KING STREET WEST, TORONTO

Research Lab Construction Starting Soon

Construction of an electronics research laboratory by McGill University will start early this summer and will be known as the Eaton Electronics Laboratory.

It will be financed by two grants, one of \$75,000 from the T. Eaton Company, Limited, announced yesterday, and a second earlier grant of \$125,000 from Lady Eaton.

Announcement of the \$75,000 grant and plans for construction of the laboratory was made yesterday by Dr. F. Cyril James, principal and vice-chancellor.

Prof. G. W. Wootton, professor of physics at the university and president of the Canadian Association of Physicists, has been appointed director of the laboratory. The new director came to McGill last year after previously holding the position of research professor of physics at the University of Western Ontario. He will continue his professorship in the department of physics at McGill.

Research in the laboratory will include special studies of microwave propagation and diffraction, the structure of matter in solid state, electron microscopy and electronic measurements. The laboratory's work in these fields will consist mainly of special projects in collaboration with other groups and of training of graduate students in physics research.

Pending construction of the laboratory, Prof. Wootton has been carrying on scientific research work in the Macdonald Physics Building on McGill campus.

College Heads Meet in June At Dalhousie

University leaders from throughout the British Commonwealth will meet at Halifax next June when the National Conference of Canadian Universities and representatives of the Association of Universities of the British Commonwealth gather at Dalhousie University.

Vice-chancellors of universities in Austria, India, Ceylon, New Zealand, Pakistan, South Africa and the United Kingdom will join in conference with heads of 23 Canadian universities.

Dr. F. Cyril James, principal and vice-chancellor of McGill University and president of the National Conference of Canadian Universities, will preside over the meeting June 12-15. For the first time in the history of the Canadian group, representatives from the other British Commonwealth countries will be in attendance.

At the same time in Halifax the Royal Society of Canada and the Canadian Political Science Association will be in conference.

McGill University will be represented by 10 delegates in addition to Dr. James. They are Dean David L. Thomson, of the faculty of graduate studies and research; Prof. H. N. Fieldhouse, chairman of the department of history; Dean Frederick Smith, of the faculty of medicine; Dean W. H. Brittain, of the faculty of agriculture and vice-principal of Macdonald College; Dean John J. O'Neill of the faculty of engineering; Rev. E. C. Knowles, university chaplain and liaison officer between the university and D.V.A.; Richard Pennington, university librarian; Dr. J. B. Kirkpatrick, director of the department of physical education; William Bentley, bursar; and T. H. Matthews, registrar of the university and secretary of the Canadian conference.

R. J. Curran to Head McGill's Law Society

Romanus J. Curran was elected president of the Law Undergraduate Society of McGill University at the last general meeting of the society this season on March 29th.

Among the activities of the past year, special notice was given to the promotion of better relations between McGill and University of Montreal law undergraduates. The law societies at both institutions sponsored bilingual debates and topped a successful year with the Themis Ball held January 22.

The debating section of the society also expanded its activities with two McGill debaters representing the university in England. One of the features of the year was the opening of a common room for undergraduates in Duggan House.

Others elected to executive posts of the society were: Vice-president, Paul Le Brooy; secretary-treasurer, Marcel Ostiguy; chairman of the sports committee, Mathew Hannon.

London—After 101 tortoises arrived in London by air from Johannesburg, the air line reported it would have taken the animals 22 years to walk the 6,300 miles. They worked out the time from a 10-yard tortoise race which a 150-year-old youngster won in 11 minutes.

EATON'S

STORE HOURS: 9.30 A.M. TO 5.30 P.M. WE CLOSE SATURDAYS AT 1 P.M.

Graduation Dreams...

of a gloriously sunny day, the impressive march through the green campus... the still, breathless moment of receiving your diploma... dreams of the garden party under the elms, in a darling white summer frock such as one of these... the excitement of that last college formal—the Convocation Ball... his dream of you looking utterly sweet in a froth of organdy or tulle, a wisp of chiffon, or pertly feminine in crisp pique... Dreams come true with the help of EATON'S Petit Salon or Young Montrealer's Shop, where we've so many lovely whites like these to make you look your prettiest on that important occasion — Graduation Day.
